THE UNIVERSAL POCKET-BOOK; BEING THE

Most Comprehensive, Useful, and Compleat
BOOK of the Kind, ever yet Publish'd:
containing amongst a great many other
Particulars,

- | | |
|---|--|
| I. A Map of the World, with a Geographical Description of the Same. | IX. A Table ready cast up shewing the Value of any Quantity of Goods at any Price. |
| II. An Historical Table of remarkable Events, from the Creation to <i>Julius Cæsar</i> . | X. Of the General and Penny-Post. |
| III. A Map of <i>England</i> , with an Account of the Number of Parishes, Market-Towns, Market-Days, Cities, Bishopricks, &c. | XI. A New Perpetual Almanack. |
| IV. A List of the House of Peers, with their Names, Title, Motto, Town-House and Country-House. | XII. The Prices of the different Works, of Bricklayers, Masons, Joiners, Carpenters, Plumbers, Slaters, Painters, Plaisterers, Paviers, Smiths, Carvers, &c. |
| V. A short abstract of the History of <i>England</i> . | XIII. Of Ancient and Modern Coins, Weights, Measures, &c. |
| VI. The Gardiner's Monthly Director in the Fruit, Flower and Kitchen Garden. | XIV. A New Plan of the City of <i>London</i> , with a Description of whatever is remarkable. |
| VII. A Table of simple Interest at 5 per Cent. | XV. An Account of all the Stage-Coaches, and Carriers in <i>England</i> and <i>Scotland</i> . |
| VIII. Rates of Watermen, Coachmen and Chairmen. | XVI. A List of Places at Court, with their Salaries and in whose Gift. |

The whole Design'd for the Use, Benefit, and
Convenience of all Sorts of Persons.

THE Title Page of this Book sufficiently shews both the Design and the Usefulness of it; and we hope the great Variety of Things to be found in it, will give it the Preference to all other Books of this Kind. All possible care and pains have been taken to render it perfect and Compleat, but if the candid Reader will transmit any Errors that he finds to the Publisher hereof, or any thing that he imagines would be of general Use to add to it, the Favour will be kindly received and thankfully acknowledg'd, the Editor being desirous to make it the most useful Book to all Families and all Kinds of Persons, that ever was yet Publish'd of the Kind.

T H E C O N T E N T S.

A Map of the World, with a Geographical Description of the Same	Page 1
An Historical Table of remarkable Events, from the Creation to Julius Caesar.	20
A Map of England with an Account of the Number of Parishes, Market-Towns, Market-Days, Cities, Bishopricks, &c.	23
A List of the House of Peers with their Names, Titles Motto, Town-House, and Country-House.	31
A short Abstract of the History of England.	43
The Gardiner's Monthly Director in the Fruit, Flower and Kitchen Garden.	53
A Table of Simple Interest at 5 per Cent.	81
Rates of Watermen, Coachmen, and Chairmen.	89
A Table ready cast up shewing the Value of any Quantity of Goods at any Price.	93
Of the General and Penny Post.	190
A New Perpetual Almanack,	197
The Prices of the different Works of Bricklayers, Masons, Joiners, Carpenters, Plumbers, Slaters, Painters, Plaisterers, Paviers Smiths, Carriers, &c.	209
Of Ancient and modern Coins, Weights, Measures, &c.	207

MAP OF THE

F THE WORLD.

THE Universal POCKET-BOOK.

A Short Description of the WORLD.

THE Science of Geography consists in giving a True Description of the Earth, in its several Divisions, *viz.*

- 1 Into imaginary Circles.
- 2 Into Land and Water.
- 3 Into Kingdoms, Principalities, &c.

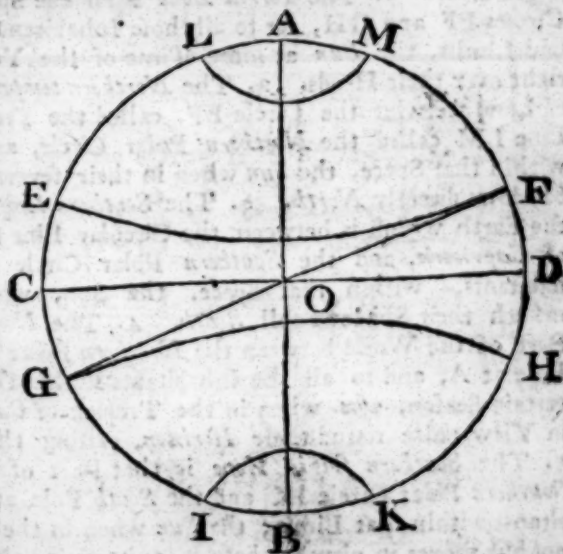

I. Of the Circles of the GLOBE.

Supposing the Figure in the Margin to be a Globe or Sphere, representing the Earth, the outermost Circle mark'd with the Letters ADBC, is call'd the *Meridian*; and on this Circle the Latitude is reckon'd, either from C towards A or B, or else from D towards A or B.

The *Equator* is the Line COD, which, upon the Globe, is a Circle, and is sometimes call'd the *Equinoctial*, upon which Circle the Degrees of *Longitude* are reckon'd, beginning at C and counting quite round the Globe till you come to C again; and is the middle of the World betwixt A and B, which are the two Poles thereof; A representing the *North Pole*, and B the *South Pole*.

The Circles EF and GH are call'd the *Tropicks*, beyond which the Sun never moves.

The Line GF, which upon the Globe is a Circle, is call'd the *Ecliptick*, in which the Sun is perpetually moving from G to F, and from F to G again. When the Sun is in O he is then in the *Equinoctial*, and the Days and

and Nights are of equal length to all the World, except under the Poles: When he is at F, which is called the Tropick of *Cancer*; Days are at the longest to all those Inhabitants that dwell on the *North* Side of the *Equator*, and at the shortest to those who dwell on the *South* Side of the *Equator*: When the *Sun* is at G, which is called the Tropick of *Capricorn*, Days are at the longest to all those Inhabitants who dwell on the *South* Side of the *Equator*, and at the shortest to those who dwell on the *North* Side.

The Circles LM and IK are call'd the *Polar* Circles, because to those Inhabitants that dwell under those Circles the longest Day is 24 Hours, so that the *Sun* sets not, but moves quite round their *Horizon*; and so much for the Circles of the Sphere, only this, *Note* that every Circle, whether great or small, is supposed to be divided into 360 equal Parts call'd Degrees, so that a Degree is no certain Measure, but is only the Three hundred and Sixtieth Part of the Circle; and these Degrees are again supposed to be divided into 60 equal Parts, which are call'd Minutes; now if a Circle, which will reach round the Earth, be divided into 360 Parts, then is one of those Parts equal to a Degree, which by the Ancients was esteemed equal to 60 Miles, so that a Mile was exactly equal to a Minute.

Of the Zones.—The Zones are certain Spaces and Tracts of Land, whose Boundaries are made by the Circles above described, and are in Number five, viz. the *Torrid Zone*; the *Northern temperate Zone*; the *Southern temperate Zone*; the *Northern frigid Zone*; and the *Southern frigid Zone*. 1. The *Torrid Zone* is all the Space of Land between the Circles EF and GH, for to all those Inhabitants that dwell betwixt the said Limits, the *Sun* at some Time of the Year becomes vertical, i. e. right over their Heads. 2. The *Northern temperate Zone* is all that Tract of Land betwixt the Circle EF, called the Tropick of *Cancer*, and the Line LM called the *Northern Polar Circle*, and to all the Inhabitants within that Space, the *Sun* when in their several Meridians casteth their Shadows directly *North*. 3. The *Southern temperate Zone* is that Part of the Earth which is between the Circular Line GH, called the Tropick of *Capricorn*, and the *Southern Polar Circle* IK, and to all the Inhabitants, within that Space, the *Sun*, when in their Meridians casteth their Shadows full *South*. 4. The *Northern frigid Zone* is that Part of the World between the *Northern Polar Circle* LM and the *North Pole* at A, and to all the Inhabitants within that Limit, the *Sun* at a certain Season, viz. when in the Tropick of *Cancer*, sets not, but moves in View quite round their *Horizon*, casting their Shadows every Way. 5. The *Southern frigid Zone* is that Part of the World between the *Southern Polar Circle* IK and the *South Pole* at B, and to all the Inhabitants within that Limit; the *Sun* when in the Tropick of *Capricorn* sets not but moves in view, as before, quite round their *Horizon*, casting their Shadow also every Way.

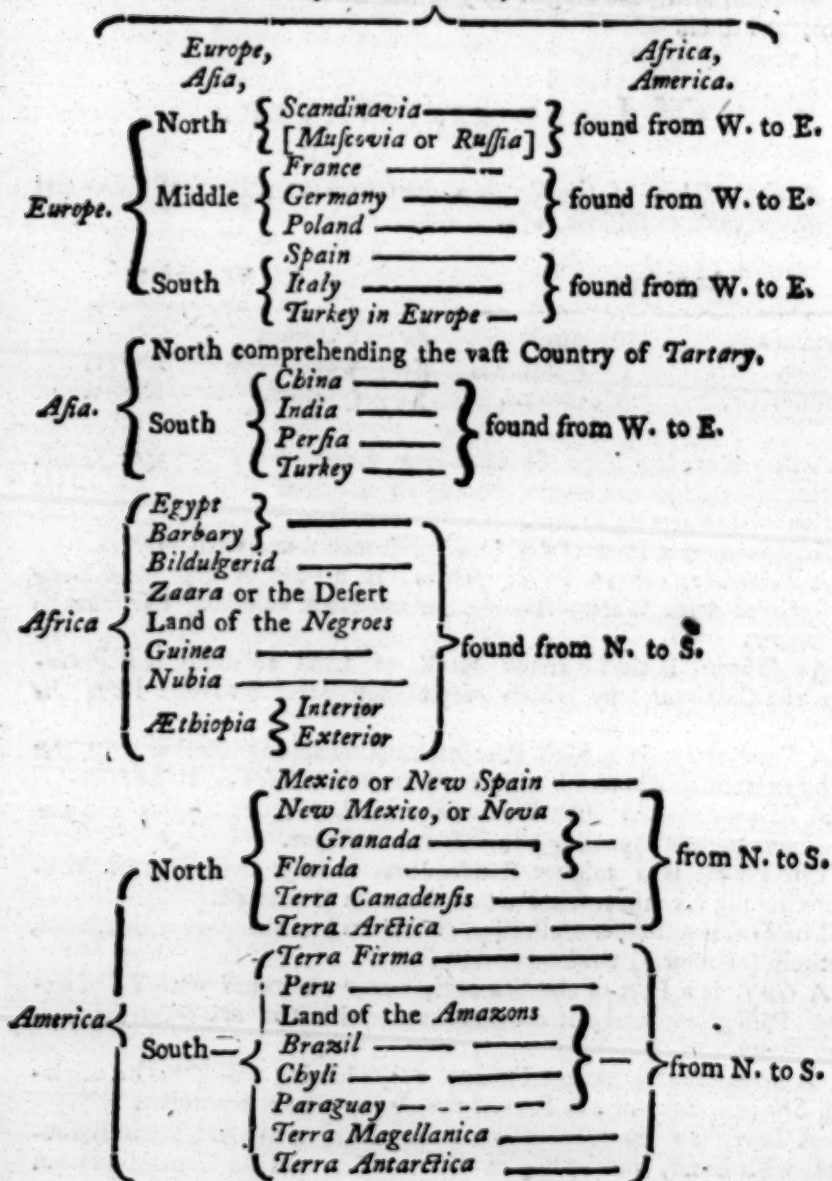

Of the Climates.—The Climates are reckon'd from the *Equator* to the Poles: Under the *Equator* their Day is always 12 Hours in length, and under the *Polar Circle* the longest Day is 24 Hours. Geographers have made 24 Climates betwixt the *Equator* and each of the *Polar Circles* because there are 24 half Hours between the Length of Day, under the *Equator*, and the longest Day under the *Polar Circles*; so that any

12. A *River*, is a considerable Stream of fresh Water issuing out of one or various Fountains, and continually gliding along in one or more Channels 'till it disgorgeth itself at last into the Ocean.

§. I. Of CONTINENTS.

Commonly reckoned four, viz. Those of

§. 2. Of

§. 2. Of ISLANDS.

They belong either to

Europe, Asia,		Africa, America.	
Europe	{ The Scandinavian Islands The Island of Iceland The Britannick Islands The Azores The Mediterranean Islands }	Lying	{ In the North & Baltick S W. of Scandinavia. N. of France. W. of Spain. S. of Europe.
Asia	{ The Japan Island The Philippin The Isles des Larrons The Moluccas The Islands of the Sund Ceylon and the Maldives }		{ E. of China. S. W. of Japan. E. of the Philippin. S. of the Philippin. W. of the Molue. W. of the Ill. of S. E. of Æthiopia W. of Negroland. W. of Bildulger. W. of Barbary. N. W. of Madag. W. of Æth. L. 00. W. of Æth. La. 3. S. W. of St. Thom. N. E. of St. Helena. W. of Nova Gran. E. of Terra Cona.
Africa	{ more re- markable { Madagafcar The Islands Cape Verd The Canary Islands The Madera Best re- markable { The Isles of Comoro St. Thomas's Island The Princess Island St. Helena Isle of Ascension }	Lying	{ E. of New Spain.
Americ.	{ North are { California Newfoundland Greater { Cuba Jamaica Hispaniola Porto rico Middle are the Antilles { Lesser { Caribbees Lucayes Sotowento Bermudas South is Terra del Fuogo }		{ S. E. of the greater. S. E. of Florida. N. of Terra Firma. E. of Florida. S. of Terra Maget.

§. 2. Of PENINSULAS.

Europe	{ Jutland Morea Taurica Cbersonesus Peninsula Indiæ { intra Gangem extra Gangem Malacba [Cbersonesia d' or	Adjacent to	{ Germany. Greece. Little Tartary. The Con. { of Asia. The Con. { Peninsula Indiæ intra Gangem. The W. of Asia. South { America. North {
Asia	{ Africa is none but Africa itself		
Americ.	{ Mexico or North America Peru or South America		

§ 4. Of ISTHMUS'S.

In Europe are the { Corinth
Isthmus's of { Taurica Chersonesus

In Asia is the Isthmus of Malacca

In Africa is the Isthmus of Sues

In America is the Isthmus of Panama

Joining { Morea to Greece.
Taurica Chersonesus
to Little Tartary.
Malac. to Penins. In-
dia intra Gangem.
Africa to Asia.
Mexico to Peru.

§ 5. Of PROMONTORIES or CAPE S.

In Europe { Cape Nord
Cape la Hague
The Land's End
The Lizard
The Start

Asia { Cape de Finisterra
Cape de Rocca
Cape St. Vincent

Africa { Cape Ningpo
Cape Comerin
Cape Razalgate

Americ. { Cape Spartel
Cape Verd
Cape of Good Hope
Cape of Guardiseu

Americ. { Cape de Florida
Cape de Coriente
Cape Froward
Cape Horn
Cape de S. Augustine

Extending from

The Northmost Part of Norway.
The N. of France.

The S. W. { of England.
The S. {

The W. { of Spain.
The W. {

The E. of China.
Peninsula India intra Gangem.

S. E. part of Arabia.
The West of Barbary.

The West of Negroland.
The South of Æthiopia exterior.

The N. E. of Æthiopia exterior.
The S. of Florida.

The W. of New Spain.
The S. of Terra Magellanica.

The S. of Terra del Fuogo.
The E. of Brazil.

§ 6. Of MOUNTAINS.

Remarkable Mountains in Europe { The Dolphbrino Hills
Boglowy
Hyperborean Mount
The Cevennes
Avergne
The Vaugue
Fitshtelberge.
Schwartzwalden
The Carpathian Mo.
The Pyrenean Hills
The Alps
The Apennine Hills
Vesuvius [a Vulcano]
Balcan

To be seen

between Sweden and Norway.

in the South part { of Muscovy.
in the North part {

} in the South part of France.

in Lorrain.

incircling Bobemia.

in the S. of Germany, viz. Suabia.

in the S. part of Poland.

between Spain and France.

between Italy and { France.
Germany.

dividing Italy into { East.
West

in the Kingdom of Naples.

in the N. of Macedon.

The

Remarkable Mountains in <i>Asia</i>	{	The <i>Holy Mount</i>	{	in the E. of <i>Macedon</i> .	
		<i>Lacha</i>		between <i>Thessaly</i> and <i>Macedon</i> .	
		The <i>Grampian Hills</i>		in <i>Scotl.</i> viz. of the River <i>Dee</i> .	
		The <i>Cheviot Hills</i>		between <i>Scotland</i> and <i>England</i> .	
		<i>Malvern Hills</i>		in <i>England</i> , viz. <i>Worcestershire</i> .	
		The <i>Peak</i>		<i>England</i> , viz. <i>Derbyshire</i> .	
		<i>Snowden</i>		in <i>Wales</i> , viz. <i>Caernarwanshire</i> .	
		<i>Plinlimmon</i>		in <i>Wales</i> in <i>Cardiganshire</i> .	
		<i>Knock Patrick</i>		in <i>Irel.</i> viz. in the C. of <i>Limerick</i> .	
		<i>Stremboli</i> [a <i>Vulcano</i>]		in a little Island W. of <i>Naples</i> .	
<i>Ætna</i> [a <i>Vulcano</i>]	in the Island of <i>Sicily</i> .				
Remarkable Mountains in <i>Asia</i>	{	<i>Imaus</i>	{	in <i>Tartary</i> .	
		<i>Caucasus</i>		between { <i>Tartary</i> .	
		<i>Sardonyx</i>		{ <i>Mogul's Empire</i> .	
		<i>Guaco</i>		on the North of <i>Peninsula</i> intra <i>Gangem</i> .	
		<i>Taurus</i>		in <i>Peninsula India</i> intra <i>Gangem</i> .	
		<i>Adam's Pike</i>		reaching from East to West of all <i>Asia</i> .	
Remarkable Mountains in	{	<i>Africa</i>	{	in the Island of <i>Ceylon</i> .	
				between <i>Zaara</i> and <i>Egypt</i> .	
				in the W. of { <i>Barbary</i> .

E U R O P E.

OF S W E D E N.

THE Air of this Country is cold, and the Soil not very fruitful, however it abounds with various Sorts of Fish, and several Mines of Tin, Brass, Iron and Copper. The longest Day in the North of this Country is about two Months, and the shortest six Hours and a Half. Its chief Commodities are Metals, Ox Hides, Goat and Buck Skins, Furrs, Tallow, Tarr, Hony, Oaks and Firs. Lutheranism is the establish'd Religion.

OF DENMARK.

This Kingdom lies North from *England*, the Air is very cold and misty, yet the Soil is good and affords plenty of Corn and Pasturage, Its chief Commodities are Fish, particularly Herrings, Furniture for Ships, Armour, Ox Hides, Tallow, Fir, Wainscot, &c. The longest Day is seventeen Hours and a Half, and the shortest eight and a Half. The establish'd Religion is Lutheranism.

OF NORWAY.

The Air of this Country is so extremely cold and the Soil so very barren, that it is but thinly inhabited. Its chief Commodities are Stock Fish, (which the poor People dry and use instead of Bread) Rich Furs, Train Oil, Pitch, Masts, Cables, Deal Boards, which they exchange for Corn, Wine, Fruits and other Necessaries of Life. The longest Day in the most Northern Parts is two Months, and the shortest in the most Southern six Hours and a Half. The *Norwegians* are a hardy People, but very mean and ignorant. The Religion establish'd is the same as in *Denmark*, but in *Lapland* and the most Northern Parts of the Country they know very little of it.

OF MUSCOVY or RUSSIA.

The Dominions of *Muscovy* or *Russia* are of very great Extent, the People hardy and vigorous, and since the late Czar *Peter*, very much polish'd and improv'd. The Air is extremely cold during three Quarters of the Year, and the short Summer they have is very hot. The Sun does not set in the most Northern Part of this Country for a above two Months, the shortest Day in the most Southern Part, is about nine Hours and a Half. The chief Commodities of this Country are Wax, Honey, Tallow, Train-Oil, Caviere, Flax, Hemp, Slad Iron, Furs, Sables, Martins, &c. The Government is very absolute and despotical, &c. and the common People so ignorant, as to believe their great Czar knows all things. The Religion is Christianity, but mixt with many *Romish* and other superstitious Ceremonies.

OF FRANCE.

France, tho' under an absolute Government and professing the *Romish* Religion, is at present the most flourishing Kingdom in *Europe*. The Air is very temperate, pleasant and healthful, the Soil extraordinary fruitful, and the Commodities Salt, Fish, Corn, Wine, Pepper, Skins, Silks, &c. The Days are about the same Length as in *England*. The Language so universally prevails, that it is us'd in most Courts in *Europe*. The Manners of the People are very polite and agreeable, and the last Age has produc'd abundance of great Men in almost every Branch of polite and useful Learning.

OF GERMANY.

Germany is divided into three Parts; North, Middle and South.

C

North

North Middle South	{	the Circle of	{	Belgium	{	Holland Flanders	}	{	Amsterdam Bruxelles Munster Hamburg Wittenburg Heidleburg Francfort Nuremburg Auszburg Munich Vienna

				The Lower Rhine					
				The Upper Rhine					
	{	the Circle of	{	Bavaria	{	Austria	}		
				Austria					

The Air and Soil of this large Country is very different according to the different Situation of its several Parts. In this great Empire are comprehended above 300 different Sovereignities, yet all or most of them subject to the Emperor of *Germany*. The Language is that call'd the *High-Dutch*. The People are famous for Sincerity in their Dealings, and much Ingenuity in Mechanick Inventions.

OF POLAND.

The Government of this Country is an elective Monarchy, and on that Account it is often harra's'd with Civil Wars and Divisions. The Air is generally cold but the Soil pretty fruitful. It abounds with several Commodities as Wax, Pitch, Salt, Soap, Rosin, Flax, Butter, Cheese, Corn, rich Furrs, &c. The Days are much the same Length as in *England*. The established Religion is Popery, but all others are tolerated.

OF SPAIN and PORTUGAL.

The Climate of these Countries is very hot, particularly in *Spain*. The People are lazy, proud, formal and very much bigotted to the superstitious Parts of Religion. They are very jealous of their Wives, who are given to Intrigues. The chief Commodities are Wines, Oil, Sugar, Rice, Silk, Honey, Flax, Raisins, Almonds, Oranges, Lemons, &c. The longest Day is fifteen Hours three Quarters, and the shortest nine Hours and a Quarter.

OF ITALY.

This is the most entertaining Country in the World for Travellers, as it contains the Remains of the greatest, wisest, bravest People that ever liv'd, viz. the Romans. The Air of this Country is pure temperate and healthful, the Soil generally exceeding fruitful, but the People so broke with Slavery, and harra's'd with the Tyrannies, Oppressions and Impostitions of their Priests, that it is not at all cultivated in the manner it might be. The chief Commodities are Corn, Wine, Oil, Rice, Silks, Velvet, Gold Wire, Armour, Glasses, &c. The People are ingenious and excel in the Arts of Statuary, Architecture, Musick and Painting.

OF TURKEY in EUROPE.

This Country comprehends *Hungary*, *Greece*, *Little Tartary*, and the *Danubian Provinces*. The Air of these Countries is very different, that of *Greece* is allow'd to be pure and temperate, the others generally not so. The Soil is pretty fruitful in Corn, Roots, and various sorts of Fruit. There are several Mines of Copper, Iron, Quicksilver, Antimony and

East. The prevailing Religion in *Hungary* is that of the Church of *Rome*; in *Greece* *Little Tartary* and the Provinces *Mahometism* is establish'd. *Constantinople* is the Seat of the *Grand Seignior* to whom they all are Subject.

A S I A.

OF TARTARY.

THE Air of this Country is very different, by reason of its vast Extent from North to South: The most Southern Parts having the same Latitude with the middle Provinces of *Spain*, and the most Northern reaching beyond the Arctick Polar Circle. The longest Day in the North is about two Months, and the shortest in the South nine Hours and three Quarters. The Manners of the People are very rude and Barbarous, their ordinary Food is Horse-flesh, and they live in Tents and open Fields. The Religion is Paganism in the North, and towards the South Mahometism prevails. The *Great Cham* of *Tartary* is an absolute Monarch, and assumes such a proud Superiority over his Subjects, as never to be spoke to but upon the Knee with their Faces towards the Ground. His Subjects stile him the Shadow of God, he looks upon himself as the Monarch of the whole World; and every Day after he has din'd, he causes the Trumpets to Sound, thereby giving leave to all the Kings and Princes of the Earth to go to Dinner. The chief Commodities of this Country are Sable, Martins, Silks, Camlets, Flax, Musk, Cinnamon, and great quantities of Rhubarb.

OF CHINA.

This is thought to be the most populous Country in the World; the Air is cold in the most Northern Parts, but generally very temperate; and the Soil is so exceeding fruitful that they are said very often to reap two or three Harvests in a Year. The longest Day is fourteen Hours three Quarters, and the shortest ten Hours three Quarters. It abounds in Gold, Silver, precious Stones, Quicksilver, Porcelane Dishes, Silks, Cottons, &c. The *Chinese* are ingenious and Lovers of Science. The Religion of the Country is Idolatry, and the Government is at present Subject to the great Cham of *Tartary*.

OF INDIA.

This vast Country comprehends all between *Persia* and *China*, viz. The *Mogul's* Empire, and the two peninsula of *India*, The one within and the other without the Ganges. In the *Mogul's* Empire the Air in general is cold, and the Soil barren. The length of the Days and Nights is about the same as in *China*. The chief Commodities are Aloes, Musk, Civet, Rhubarb, Indigo, Borax, Opium, Silks, Cottons, Carpets and most sorts of Spices. The Religion is Paganism, and in some Parts Mahometism. The Government is arbitrary, and the Great *Mogul* Heir to every Man's Estate, which he disposes of at his Pleasure. The Throne he sits on is the richest in the World. In the Peninsula within the Ganges the Air is very hot, and the Soil exceeding fruitful. The longest Day is thirteen Hours and a Half, and the shortest eleven

and a Half. The Commodities are Metals, Silk, Cotton, Pearls, Drugs, Dates, Cocons, Rice, Ginger, Cinnamon, Pepper, Cassia, &c. The Religion is generally Mahometism. The Government is various and Subject to many different Princes, but in some Parts, the People are Subject to no Government at all. In the Peninsula beyond the Ganges, the Air is more temperate and the Soil, if possible, more fruitful. It abounds with Mines of Gold, and great Quantities of precious Stones: nay so vastly rich is this Country that it is thought by many to be the Land of *Opbir*, to which *Salomon* sent his Ships for Gold. The Commodities of this Peninsula are much the same as in the other. And the Days the same length.

Of P E R S I A.

The Air of this Country is temperate enough in the Northern Parts, but in the Southern excessive hot. The Soil is generally fruitful. The longest Day is fourteen Hours and three Quarters, and the shortest thirteen Hours and a Quarter. The Commodities are curious Silks, Carpets, Tissues, Manufactures of Gold, Silk and Silver, Seal-skins, Goat-skins, Alabaster and all sorts of Metals. The People are very civil to Strangers, Luxurious, extravagant in their Expences, and much addicted to Astrology. The Religion is Mahometism, and the Government absolute, being entirely Subject to the Will of their Emperor, who is still the *Great Sophy* of *Persia*.

Of T U R K Y in A S I A.

This vastly extended Body comprehends *Natolia*, *Arabia*, *Syria*, *Phanicia*, *Palestine* or *Judea*, and the *Euphratian* Provinces. The Religion of all these Countries is generally Mahometism, but in some Parts there are a great many Christians and Jews. Their Governments are various, but they are all Subject to the Grand Seignior; The Tyranny of whose Government so discourages Industry, and depopulates the most fruitful Countries, that these *Phanicians* which of old were so famous for Trade and Commerce, are now become a poor and despicable People; and *Judea* the Land which for its fruitfulness was said to flow with Milk and Honey is now a barren and uncultivated Place.

A F R I C A.

Of E G Y P T.

THE Air of this Country is very hot, and unwholesome; the Soil as fertile as any in the World, occasion'd by the Yearly overflowing of the Nile; but that it never rains in this Country may justly be thought a vulgar Error. The longest Day is fourteen Hours and a half, and the shortest ten and a half. The chief Commodities are Sugar, Flax, Rice, all Sorts of Grains and Fruits, Linnen Cloath, Salt, Balsam, Senna, Cassia, &c. The Religion is Mahometism, and the Government is Subject to the Grand Seignior.

Of B A R B A R Y.

The Air of this Country is temperate and healthful, and the Soil fruitful. Its chief Commodities are Honey, Wax, Oil, Sugar, Flax, Hides,

Hides, Dates, Almonds, &c. Days near the same length, as in *Egypt*. This large Country comprehends *Morocco*, *Fez*, and several other Provinces, Subject to the King of *Morocco*. *Tunis*, *Algiers*, and some others Subject to the Grand Seignior. The Mahometan Religion is profess'd here, but they differ in many things from all other Mahometans.

OF BILDULGERID.

This large Country is partly subject to the *Turks*, and partly to the King of *Morocco*. The Climate is very hot, yet generally esteem'd wholesome. The Soil is but indifferent, and the Commodities few, the chief are Corn, Cattle, Dates and Indigo. The little Religion they have is Mahometism.

OF ZAARA or the DESART.

Much the same may be said of this Country as the last only that it is more Sandy and Barren, and the Inhabitants, if possible more Savage and Ignorant.

The LAND of NEGROES.

The Air of this Country is very warm, yet esteem'd so very healthful that sick Persons are said to be brought hither in order to recover their Health. The Soil is exceeding rich, especially towards the River *Niger*, which overflows a considerable Part of it, as the *Nile*, doth *Egypt*. Here is great store of Corn, and Cattle, and various Herbs. The Woods abound with *Elephants* and other Beasts, both Wild and Tame. The longest Day is thirteen Hours and a Quarter and the shortest eleven Hours and a Quarter. The Commodities are Ostrich Feathers, Gums, Amber, Gold, Red-wood, Civet and Elephants teeth.

OF GUINEA.

The Air of this Country is exceeding hot, and unwholesome to Strangers, the Soil very fruitful, and the Country abounds with *Elephants*, Mines of Gold, and Rivers which afford abundance of Pearl, and Gold-dust. The longest Day is twelve Hours and three Quarters, and the shortest eleven Hours and three Quarters. The Inhabitants of this Country are reckon'd the blackest of all the Negroes and most of them go quite Naked. They are very Ignorant and Superstitious, and in some Parts are said to Offer human Sacrifices. They think God Almighty a very good Being, and on that account are civil to him, but they worship the Devil, and pray to him heartily, for fear he should hurt them.

OF NUBIA.

Much the same may be said of *Nubia* as *Guinea*.

OF ETHIOPIA.

Ethiopia is divided into interior and exterior. *Interior*, or the Land of the *Abyssines*, is wholly within the torrid Zone and consequently extremely hot. The Soil near the *Nile* is exceeding fruitful, but distant from that, the Country is full of Mountains and sandy Desarts. The longest

longest Day is thirteen Hours and a half, and the shortest ten Hours and a half. The Commodities are Gold, Metals, Gems, Corn, Cattle, Salt, Flax, Wine, Sugar, Canes, &c. The People are composed of Pagans, Jews, Mahometans and Christians, but that which most prevails is said to be Christianity. The Government is subject to an Emperor whom we call *Prefter John*. *Ethiopia* interior comprehends a great many Kingdoms, and States, and is of vast extent, consequently the Air and Soil is very various. The Commodities are Gold, Silver, Pearls, Ivory, Oil, Ambergrease, Musk, Rice, Millet, Lemons, Citrons, &c. The Manners of the People are generally Savage and Barbarous. In some Parts Human Flesh is sold in Shambles as common as we sell Beef and Mutton. The People called Hottentots inhabit Part of this Country, and are the nastiest of all Creatures; they besmear themselves with Grease, and all kinds of Filth, and think they adorn themselves by hanging the Guts and Garbage of the Beasts they kill about their Necks.

A M E R I C A.

OF MEXICO or new SPAIN.

THIS Country lies for the most Part within the torrid Zone, yet the Air is temperate and healthful, being refresh'd with cool Breezes from the Sea. The Soil is very fertile, producing many sorts of Grain, as Wheat, Barley, Pulse and Maize; several kinds of Fruits, as Pomgranates, Oranges, Lemons, Citrons, Cherries, Malicats, Pears, Apples, Figs, Cocoa Nuts, &c. And great plenty of Herbs, Plants and Roots: with some rich Mines, of Gold and Silver. The longest Day is thirteen Hours and three Quarters, and the shortest twelve Hours and a half. The Manners of the People are civil, and they excel in Painting and playing on several musical Instruments. The Government is Subject to the King of Spain, and the Religion a mixture of Paganism and Christianity.

Of new MEXICO, or GRANADA.

This Country is not fully discover'd. The Soil is dry sandy and barren, the Air temperate and healthful, but subject to great Hurricanes with terrible Thunder and Lightning. The Commodities are few, Cattle being the only thing they trade in. The Natives are govern'd by certain Captains of their own; the *Spaniards* residing here and some few of the more civiliz'd Natives, are subject to the King of Spain. The Religion of the Country is Paganism, but in some Places they seem to have very little Notion of any Religion at all.

OF FLORIDA.

The Climate of this Country is so temperate, that the Inhabitants live to a great Age. The Soil is prodigious fertile, producing most Sorts of Grain Herbs and Fruit. The Mountains are lin'd with considerable Mines of Gold and Silver, the Rivers afford vast Numbers of valuable Pearls. The longest Day is fourteen Hours and a Quarter, and the shortest Day nine Hours. The People are naturally white, but they colour

colour themselves so as to appear olive Colour, and commonly go quite naked, except a small piece of Deer Skin, which some wear about their Middle.

OF TERRA CANADENSIS.

Terra Canadensis consists of several large and considerable Countries, most of them belonging to the *English*, as *New England*, *New York*, *New Jersey*, *Pensilvania*, *Maryland*, *Virginia*, *Carolina*, &c. The Air of all these Places is generally temperate and healthful and the Soil fruitful. The Commodities are the Skins of Elks, Deer, Bever, Otters, Bears, and Leopards, also Oil, Olive, Cotton, Indico, Ginger, Tobacco, Turmeric, Snake-root, Hemp, Flax, Hops, Rapeseed, Madder, Furrs, &c. The longest Days in most of these Places are about fifteen Hours and the shortest about nine Hours.

OF TERRA ARCTICA.

This comprehends all the Countries within the Arctick Polar Circle, viz. *Greenland*, *Spitzberg*, *Nova Zembla*, *Terra de Jessö*, *New Denmark*, *New North-wales*. Of these Countries little more is known, than that they are extremely cold and barren, and afford very few Commodities.

OF TERRA FIRMA.

The Climate here is very hot, yet not unwholesome; the Soil fertile; producing great plenty of Corn and Fruits. It abounds with precious Stones, Pearls, Mines, of Gold, Silver, Brass, &c. The longest Day is twelve Hours and a half, and the shortest Day twelve Hours. The Religion of the Nation is Idolatry, and the Government in a great Measure, subject to the King of *Spain*.

OF PERU.

This is esteem'd the richest of all the Plantations belonging to the *Spaniards*. The Air of this Country is in some Places extremely hot, and in others very cold. The Soil in like manner very fruitful in some Parts, and in some Sandy and barren. Its Commodities are vast quantities of Gold and Silver, rich Pearls, abundance of Cotton, Tobacco, Cochineal, medicinal Drugs, &c. The longest Day is twelve Hours and a Quarter, and the shortest Day ten Hours and a half. This Country was formerly govern'd by King, call'd *Inca's*, but it is now almost entirely subject to the Kings of *Spain*, whose Viceroy resides at *Lima*. The Natives worship the Sun, Moon and Stars, Thunder and Lightning, &c.

The LAND of the AMAZONS is very little known.

OF BRAZIL.

THE Air of this Country is more temperate than one would expect, it lying mostly under the torrid Zone. The Soil is fertile, and the Commo-

Commodities, Sugar, Amber, Rosin, Tobacco, Train, Oil, Confectures, and great quantities of red Wood used by Dyers. The longest Day is twelve Hours and a Quarter, and the shortest Day ten Hours and a half. The *Portuguese* have Settlements upon most of the Sea Coasts, and the Viceroy of *Portugal* resides at *St. Salvadore*.

OF CHILI.

The Air of this Country in Summer, is much of the same Quality as in Spain; but in Winter the cold is so excessive, that it frequently kills both Man and Beast. The Soil is generally dry and barren, but towards the Sea, the Vallies are very fruitful and produce great plenty of most Sorts of Grain. The longest Day is thirteen Hours and a half, and the shortest Day is seven Hours and a half. The Chief Commodities are Gold, Silver, Maize, Corn, Honey, Ostridges and several Metals. The Country is mostly subject to the King of Spain. The Natives are reckoned the grossest Idolaters of all the *Americans*, worshipping the Devil, whom they term *Eponamon* which signifies Strong or Powerful.

Paragua, *Terra Magellanica*, and *Terra Antartica*, are very imperfectly known.

A short Historical TABLE of the most remarkable EVENTS, that happen'd in the WORLD, from the Creation to the Death of *Julius Caesar*.

THE most ancient History we have, is the Bible; A.M. B.C.
 from that we learn, that it is now upwards of,
 5700 Years since the World was Created. But
 the account which *Moses* gives is so very concise, that for
 the first 2000 Years we have very little Information,
 what was done amongst Mankind, save that they were
 so exceeding wicked, that in all the World only *Noah*
 and his Family found favour with God, and were preserved
 from that Deluge which destroy'd the whole Earth besides. 1657 2347
 The Building of *Babel* (or *Babylon*). The Division of Lan-
 guages. And the Dispersion of Mankind. 1757 2247
Nimrod the Son of *Cush* founds the *Babylonian* Empire,
Affur the Son of *Sem* builds a City, (which was afterwards
 called *Nineveh*) and founds the *Assyrian* Empire. 1814 2190
 The Monarchy of *Egypt*, establish'd by *Misraim* the Son of
Ham.
Fohi first King of *China*.
 The *Arabians* Pastoral Kings of *Egypt*. 1920 2084
 The Death of *Noah* in the 950th Year of his Age, 350
 Years after the Flood.

The Birth of <i>Abraham</i> .	2009	1996
The Kingdom of the <i>Argives</i> , establish'd under <i>Inachus</i> .	2168	1836
The <i>Chaldeans</i> take <i>Babylon</i> .	2242	1762
<i>Joseph</i> sold into <i>Egypt</i> .	2299	1705
The Birth of <i>Moses</i> .	2430	1574
A Colony from <i>Egypt</i> , under the Command of <i>Cecrops</i> , build the City of <i>Athens</i> .	2467	1537
The <i>Chaldeans</i> drove out of <i>Babylon</i> by the <i>Arabians</i> .	2494	1510
The <i>Israelites</i> delivered from <i>Egypt</i> by <i>Moses</i> .	2513	1491
<i>Sesostris</i> King of <i>Egypt</i> , conquers <i>Arabia</i> , <i>Persia</i> , <i>India</i> , <i>Scythia</i> , <i>Thrace</i> , <i>Asia</i> the <i>Less</i> , <i>Syria</i> in about 9 Years.	2522	1482
The famous Philosopher <i>Hermes Trismegistus</i> was privy Counsellor to this Monarch.		
The Destruction of <i>Troy</i> .	2820	1184
<i>Aeneas</i> flies into <i>Italy</i> , kills <i>Turnus</i> King of the <i>Rytuli</i> , in a single Combat, marries <i>Lavinia</i> , Daughter of <i>Latinus</i> , and builds the City of <i>Lavinium</i> . The <i>Aeneid</i> of <i>Virgil</i> is built upon this Story.	2835	1169
The Temple of <i>Jerusalem</i> , built by <i>Solomon</i> .	3000	1004
The Olympick Games, which were first instituted by <i>Hercules</i> at the foot of Mount <i>Olympus</i> , in honour of his Father <i>Jupiter</i> , are revived in <i>Peloponessus</i> by <i>Iphytus</i> . From hence, the <i>Greeks</i> begin the <i>Epocha</i> of their <i>Olympiads</i> .	3228	776
<i>Rome</i> built by <i>Romulus</i> , first King of <i>Rome</i> .	3251	753
About this time liv'd <i>Homer</i> and <i>Hesiod</i> Greek Poets.		
<i>Sardanapalus</i> having provok'd his Subjects by his Effeminacies to rebel against him, and being besieg'd in <i>Nineweb</i> by <i>Nabonassar</i> and <i>Arbaces</i> , his Lieutenants General, burns himself, his Wives, his Children, and all his Treasures.	3257	747
<i>Lycerges</i> perswades the <i>Lacedemonians</i> , to change their Form of Government which was Monarchial to a mixt Form of Monarchy and Aristocracy.	3278	726
<i>Corinth</i> , about 600 Years after its first building, alters its Form of Government from Monarchial to a Republick.	3290	714
<i>Numa Pompilius</i> second King of <i>Rome</i> , begins to reign, divides the Year into twelve Months.	3291	713
The Destruction of the first Temple of <i>Jerusalem</i> , by <i>Nebuchadnezzar</i> King of <i>Babylon</i> .	3416	588
About this time liv'd <i>Daniel</i> the Prophet; <i>Arion</i> , <i>Alceus</i> , <i>Epimnides</i> , Greek Poets; <i>Sappho</i> the Poetess, and <i>Pythagoras</i> the Philosopher.		
<i>Craesus</i> the last King of <i>Lydia</i> , defeated and taken Prisoner by <i>Cyrus</i> .	3456	548
About this time lived the seven Wise Men of Greece, viz. <i>Thales</i> the <i>Milesian</i> , <i>Chylon</i> the <i>Lacedemonian</i> , <i>Gleobulus</i> of <i>Corinth</i> ; <i>Byas</i> of <i>Pryene</i> ; <i>Pittacus</i> of <i>Mitelenes</i> ; and <i>Solon</i> of <i>Salamis</i> .		
<i>Cyrus</i> sets the Jews at Liberty.	3464	540
Now sung the merry Poet <i>Anacreon</i> .		
The <i>Marquins</i> the Proud, the seventh and last King of <i>Rome</i> , expell'd. <i>Rome</i> had now been govern'd by Kings 245		

Years.

	A.M.	B.C.
Years. Afterwards two Consuls were anually elected in their Place.	3496	506
Rome besieg'd by <i>Porfenna</i> , King of the <i>Tuscans</i> , in favour of <i>Tarquin</i> .	3496	506
<i>Darius</i> King of <i>Persia</i> , sends to demand Earth and Water, as Homage from the Græcian Cities in <i>Europe</i> ; and having sent a great Army against the Græcians, they win the famous Battle of <i>Marathon</i> , by the Conduct of <i>Miltiades</i> the <i>Athenian</i> General.	3511	493
<i>Tribunes</i> establish'd for the Roman People.	3520	484
<i>Quintus Cincinnatus</i> the first Dictator chose by the Romans.		
<i>Leonidas</i> , at the Straits of <i>Thermopilæ</i> with 300 <i>Lacedemonians</i> who all dy'd upon the Spot, kills 2000 <i>Persians</i> .	3525	479
<i>Pindar</i> and <i>Symonides</i> Lyrick Poets, and <i>Sophocles Euripides</i> , <i>Tragick</i> Poets flourish'd about this time.		
The Jews finish the building of their Temple, from whence they begin their seventy Weeks.	3550	454
About this time liv'd <i>Æschylus</i> the Poet, <i>Herodotus</i> and <i>Thucydides</i> the Historians, and <i>Isocrates</i> the Orator.		
The <i>Peloponnesian</i> War began between the <i>Athenians</i> and <i>Lacedemonians</i> .	3571	433
<i>Themistocles</i> banish'd by the <i>Athenians</i> .	3590	414
<i>Aristophanes</i> the Poet, <i>Socrates</i> the Philosopher, and <i>Alcibiades</i> the <i>Athenian</i> General liv'd about this time.		
<i>Alexander the Great</i> Born. —————	3648	356
<i>Plato</i> dies		
<i>Demosthenes</i> the <i>Athenian</i> Orator, <i>Aristophanes</i> the Poet, <i>Diogenes</i> the <i>Cynick</i> , and <i>Aristotele</i> the Philosopher liv'd about this time. <i>Alexander</i> after having reign'd twelve Years, in which time he conquer'd the greatest part of the known World, dies in the 32d Year of his Age.	3680	324
Now flourish'd <i>Heraclitus</i> , <i>Democritus</i> , <i>Zeno</i> , <i>Euclid</i> , and <i>Epicurus</i> .		
<i>Arfaces</i> frees the <i>Partians</i> from the <i>Macedonian</i> Yoke, and lays the Foundation of the <i>Partbian</i> Empire.	3758	246
About this time liv'd <i>Borofus</i> the <i>Chaldean</i> , who writ the History of <i>Assyria</i> and <i>Babylon</i> , and <i>Plautus</i> the Poet at <i>Rome</i> .		
The first Punick War begun.	3768	236
The second Punick War begun by <i>Hannibal</i> .	3795	209
<i>Scipio</i> vanquishes <i>Hannibal</i> in <i>Africa</i> .	3802	202
About this time liv'd <i>Ennius</i> and <i>Terence</i> , Roman Poets.		
Divisions at <i>Rome</i> , between the Senate and People. <i>Marius</i> sides with the People, <i>Sylla</i> opposes and kills him. This was the first Civil War amongst the Romans.	3923	81
<i>Diodorus Siculus</i> the Greek Historian flourish'd about this time, and <i>Cicero</i> the Roman Orator. <i>Cato</i> being besieg'd by <i>Cæsar</i> at <i>Utica</i> kills himself.	3958	46
At this time the <i>Julian</i> Account came in use, <i>Cæsar</i> , as sovereign Priest, having reform'd the Kalendar.		
<i>Cæsar</i> returning to <i>Rome</i> , celebrates five Triumphs for <i>Gaul</i> , <i>Egypt</i> , <i>Pontus</i> , <i>Africk</i> and <i>Spain</i> .	3959	45

the great Power and Honours given to *Cæsar* by the Romans, alarm some of the Chief Nobility, and occasions the Conspiracy against him by *Brutus*, *Cassius*, *Trebonius*, *Cæsa*, and others, who kill him in the Senate House.

The Senate and People of *Rome* by general Consent, confer on *Octavianus* the whole Monarchy of the Roman Empire, with the Name of *Augustus*, which he and his Successors ever after bore.

3960

44

The glory of the Romans was now at its full Height. At this time flourish'd *Dionysius Halicarnassus* the Greek, and *Titus Livius* the Roman Historian; together with the Poets *Virgil*, *Horace*, *Ovid*, *Cornelius Gallus*, *Tibullus*, *Propertius*, with many others of great Note. In fine, all Kinds of Polite Learning and Science, did never so universally flourish as in the *Augustan Age*.

A short Description of ENGLAND:

ENGLAND is divided into 40 Counties as follow.

B E D F O R D S H I R E.

A Short ABSTRACT of the HISTORY of ENGLAND.

JULIUS CÆSAR invaded Britain and made it tributary to the Romans in the Year of the World 3945. A. D.
at 100 Years after

Claudius Cæsar made an Expedition into Britain, and conquered Part of the Island.

Nero succeeding in the Empire sent his Lieutenant Suetonius Paulus into Britain, but the Britons set upon him and slew 8000 Romans: but in the next Encounter 80000 Britons were slain

Titus Vespasian sent his Deputy Julius Agricola, who victoriously extended the Roman Proviace in Britain, beyond all Predecessors.

43

57

79

And

And thus the *Romans* for the Space of 500 Years reign'd in Britain. At last the *Britains* elected themselves several Kings to manage their Wars against the *Picts* and *Scots*: and being deserted by the *Romans*, they invited the *Saxons* to their Assistance, who accordingly landed in the Island under the Conduct of two Brothers *Hengist* and *Horsa*, who advancing as far as *Stamford* in *Lincolnshire*, gave Battle to the *Scots* and *Picts* and vanquish'd them.

The *Saxons* by degrees over-run the whole Island, and divided it into seven Kingdoms (called the *Heptarchy*.) The Island continued in this State upwards of 360 Years, when *Egbert* King of the West *Saxons*, reduc'd all the contending Kings under his Subjection, and gave the Name of *England* to the Kingdom, from the *Angles* whence he came. He was the first sole Monarch of *England*, and having reigned 17 Years died.

In his Reign, the *Danes* first invaded *England* with 32 Ships consisting of 23000 Men, but were put to Flight.

Ethelwolf, *Egbert's* eldest Son succeeded him and reign'd 20 Years.

Ethelbald eldest Son of *Ethelwolf*, succeeded his Father and reigned two Years.

Ethelbert his Brother succeeded, and reigned 7 Years.

Ethelred third Son of *Ethelwolf* succeeded, and having reigned 7 Years, was slain in Battle against the *Danes*; who were now very numerous in the Kingdom.

Alfred 4th Son of *Ethelwolf* succeeded; he fought nine Battles with the *Danes* in one Year, and forc'd them to depart the Kingdom. He first put the *English* upon building Ships, and so securing themselves by Sea. He clear'd the Land of Thieves and Robbers: And for the better Administration of Justice, he divided the Kingdom into Shires, Hundreds and Tythes. He founded the first College in *Oxford*, now call'd *University College*. For his Virtues, Learning and Abilities, he was honoured with the Title of *Alfred* the Great, and may justly be called the first Civilizer of the *English* Nation. He reign'd 29 Years.

Edward the elder succeeded his Father, and reigned 23 Years.

Ethelstan, *Edward's* eldest Son succeeded, and reign'd 16 Years. He caused the Bible to be translated into *English*.

Edmund succeeded his Brother *Ethelstan* and reigned 6 Years.

Edred reigned 9 Years.

Edwin reigned 4 Years, and was deposed by the *Monks*.

Edgar his Brother succeeded, he cleared the Land of Wolves and wild Beasts. He reigned 16 Years.

Edward the younger reigned 3 Years.

Ethelred reigned 38 Years. In his Reign there was a great Massacre of the *Danes*, who were become intolerable to the *English*. He dying

Edmund Ironside, third Son of *Ethelred* succeeded; but he was rivalled by *Canute* the *Dane*, with whom he was forced to share the Government; and after his Death the *Danes* became sole Masters of the Island, after it had been in Possession of the *Saxons* 566 Years, and continued their Sovereignty about 24 Years under 3 Kings, viz.

Can

Canute who reigned 14 Years,
Harold I. who reigned 7 Years, and
Hardicanute who reign'd 3 Years.

A.D.

1042

Then succeeded *Edward* the Confessor, the seventh Son of
ing Etbelred. He collected all the Laws of his Predecessors into
 the Body which is the Origin of our common Law. He was
 the first of our Kings that attempted to cure the King's-Evil
 with a Touch, and the first that sign'd his Patents with the Seal.
 now call'd the King's Broad Seal. He reigned 24 Years.

1066

After his Decease, *Harold* Son of *Godwin* Earl of *Kent* was
 made King, but before he had reign'd a Year, *William* Duke of
Normandy pretending a Right to the Crown of *England*, landed
Sussex on the 8th of *September* 1066, and on the 14th of *Octo-*
 following, was fought the memorable Battle of *Hastings*, in
 which was kill'd King *Harold* and his two Brothers; most of the
English Nobility, 97974 common Soldiers.

1066

WILLIAM THE CONQUEROR was crowned King of *Eng-*
land on *Christmas* Day.

He built the Tower of *London*.

He caused a Survey to be taken of the whole Kingdom (which
 still to be seen in the Book call'd *Dooms-Day Book* kept in
 the Tower of *London*) and rais'd from every Hide of Land (or 100
 Acres) six Shillings.

He first appointed Justices of the Peace, and Juries; ordain'd
 the Court of Chancery and Exchequer.

He pulled down 36 Parish Churches, and dispeopled the Country
Hampshire for 30 Miles in Compass; to make a Chase for
 hunting, now call'd the *New Forest*.

In the Year 1072, *Waltheof* Earl of *Huntington* was beheaded;
 the first Nobleman that ever was beheaded in *England*.

He reign'd 21 Years, and was crown'd every Year anew.

He appointed by Will his 2d Son *WILLIAM RUFUS* to
 succeed him, who was crown'd.

1087

Anselm Archbishop of *Canterbury* is banish'd the Kingdom for
 maintaining the Pope's Supremacy against the King's Prerogative.

Malcolm King of *Scotland* invades *England*, and is kill'd by
William.

In this King's Reign the Holy War was first undertaken,
 which continued near 300 Years.

He built *Westminster-Hall*, which is 270 Feet long and 74
 Feet high.

The Sea overflow'd its Banks and drown'd 4000 Acres of
 Land, which had been Earl *Godwin's*, now call'd *Godwin's*
 Marsh in *Kent*.

Having reign'd near 13 Years, he was shot by Sir *Walter*
 Tyrrell levelling an Arrow at a Deer.

H E N R Y I.

the youngest Son of the Conqueror succeeded.
 In this Reign St. *Bartolomew's Hospital* in *Smithfield* was
 founded by a Jesuit of the King's, named *Rejor*. Before this,

1100

Smithfield

Smithfield was the Place where all Malefactors were executed. Now liv'd *Jeoffry* of *Monmouth* the Historian. The first Parliament of *England* was summon'd by this King at *Salisbury*. He died by a Surfeit of Lampreys after he had reigned 35 Years.

S T E P H E N.

Grandson of the Conqueror by *Alice* his Daughter, succeeded to the Crown.

He granted his Subjects a Charter of some Immunities, dated under his Hand at *Oxford*.

In this Reign great part of the Cities of *London*, *York* and *Rocheſter* were destroyed by Fire.

He reign'd 18 Years and 10 Months.

H E N R Y II.

Son to *Maud* the Empress sole Daughter of *Henry I.* succeeded. Coaches were now first used in *England*.

Thomas Becket Archbishop of *Canterbury* murder'd in the Church. *London Bridge* built of Wood.

The City of *Leicester* was burnt by the King's Command.

He divided the Kingdom into six Circuits, and appointed three Itinerant Justices for each of them.

He kept the famous *Rosamond*, Daughter of Lord *Clifford*, in a secret Bower at *Woodstock*, but being discover'd by Queen *Elonor*, she was poisoned.

He reigned 35 Years, and was succeeded by his Son

R I C H A R D I.

He was firnamed for his Courage, *Cœur de Lion*.

On his Coronation Day, the 3d of *September*, was a great Slaughter of the Jews.

About this Time liv'd *Robin Hood* and *Little John*.

In this Reign was the first Lord Mayor chosen, nam'd *Henry Fitz Alwyn*, who was Mayor 24 Years together. *London* before was always govern'd by a Magistrate call'd the *Port-Sbreeve* or *Provost*.

He reigned upwards of nine Years, and was succeeded by his Brother

J O H N.

He had like to have lost his Kingdom to the French.

The Barons Wars begun.

King *John* submits himself and his Kingdom to the Pope's Legate.

He grants Letters Patent to the *Citizens* to chuse a Mayor Yearly.

In the Year 1209, *London Bridge* (which before was of Wood)

as built with Stone, by 3 Merchants viz. *Mercer, Alman,*
and Botwright,
 He reigned about 17 Years and was succeeded by his Son

H E N R Y. III.

This King confirmed the Statute of *Magna Charta.*

1216

Made his eldest Son Prince of *Wales*, which Title the King's
 eldest Son hath retain'd ever since.

He fortify'd the Tower of *London* with a Bulwark, which was
 built twice, and twice overthrow'n in one Year's time.

He caus'd a Chest of Gold to be made for laying up the Re-
 licks of *King Edward* the Confessor, in the Church of *West-*
minster.

He reign'd 56 Years, and was Succeeded by his Son

E D W A R D. I.

This King, first order'd Farthings and half Pence to be made.

1272

In his Reign Corn was first sold by Weight.

His Consort, *Queen Eleanor*, dying near *Lincoln*, was brought
 up to be bury'd at *Westminster*, and at every Place where the Corps
 rested he built a magnificent Cross with her Image upon it.
Coventry Cross, *Cheapside* Cross and *Charing* Cross, were three
 of them.

In the Year 1294, was the first Alderman chose, being
Nicolas Farringden.

He reign'd upwards 34 Years, and was succeeded by his Son

E D W A R D. II.

Who render'd himself hateful to his Subjects, by his unrea-
 sonable attachment to his Favourites, *Pierce Gaveston* and the
Spencers, and having reign'd upwards of 19 Years, was depos'd by
 the Parliament, and forc'd to resign his Kingdom to his Son.

In this Reign liv'd *Sir John Mandeville* the greatest Traveller
 and the greatest Lyer in the World.

E D W A R D. III.

1307

This was one of the greatest Princes that ever sat on the
English Throne, he subdu'd *Scotland*, conquer'd *France*, and
 appointed himself to be call'd King of *England* and *France*,
 quartering the Arms of the two Kingdoms together.

1326

He instituted the Order of the Garter, his Son the Black
 Prince took the King of *France* Prisoner and brought him to
England.

He commanded all Pleas to be made in *English* and not in
French as had been us'd from the Conquest.

He built the Castle of *Windsor.*

Fifty Thousand dy'd in *London* of the Plague in one Year.

About this time liv'd *Wickliffe*, one of the first who ventur'd
 to expose the Errors of the Church of *Rome*, and *Dr. Orum* of

Oxford

Oxford who wrote an Epistle from *Lucifer* to the Clergy, thanking them for sending so many Souls to Hell.

He reign'd 50 Years and was succeeded by his Grandson.

R I C H A R D. II.

In his Reign Powder, and the Use of Guns was first found out.

The Rebellion of *Wat Tyler* and *Jack Straw*.

Chaucer the Father of *English* Poetry liv'd now.

Richard the 2d for many Enormities was depos'd after he had reign'd 22 Years, and was afterwards murder'd in *Pomfret Castle*.

H E N R Y. IV.

Son of *John* of *Gaunt* succeeded him, being chosen by the consent of the People.

In this King's Reign, at *Skinnerwell* near *Clerkenwell*, was a great Play which lasted 7 Days, containing a Representation of several Things from the Creation of the World: most of the Nobility and Gentry of the Kingdom were present at it. And afterwards began a Royal Tournament in *Smithfield*.

He Reign'd 23 Years and was succeeded by his Son.

H E N R Y. V.

Who tho his during his Father's Reign, he liv'd dissolutely, robbing upon the Highway, and associating only with Whores and Villains, yet when he came to the Crown prov'd one of the wisest and most valiant Kings the *English* ever had.

In his Reign Sir *John Oldcastle* Sir *Roger Aston* and 28 more were hang'd and burnt in *Smithfield*, for maintainin Dr. *Wickliffe's* Opinions.

He reign'd upwards of nine Years and was succeeded by his Son

H E N R Y. VI.

In his Reign was paid the first Custom for all Merchandizes, imported and exported out of the Realm, settled by an Act of Parliament but for 3 Years, in which was a Proviso that it should never be made a Precedent for the like to be done after that Term was expir'd: but all his Successors have had it for Life, so forcible is a Precedent once fix'd in the Crown.

Elinor Colham Dutches of *Gloucester* is accus'd and convicted of Witchcraft, and oblig'd to do publick Pennance for the same.

In 1450 was *Jack Cade's* Rebellion.

Printing first invented.

After he had Reign'd 38 Years he was depos'd by

EDWARD

E D W A R D IV.

A. D.
1460

Who after 9 bloody Battles was quietly seated in his Dominion. This King sate in Person 3 Days together to see how his Laws were executed.

In this King's Reign *George Nevill*, Archbishop of York made Feast, an Account of which is among the Records of the Tower, viz. 300 Quarters of Wheat, 300 Tuns of Ale, 100 Tuns of Wine, 104 Oxen, 6 wild Bulls, 1000 Sheep, 608 Calves, 400 Swine, 3000 Geese, 1000 Capons, 3000 Pigs, 50 Plovers besides Quails, Rees, Peacocks, Mallards, Teals, cranes, Kids, and above 20 other several sorts of Things each in proportionable Numbers to what is above.

He Reign'd 22 Years and was succeeded by his Son

E D W A R D V.

1483

Who was but 13 Years old, and before his Coronation was murder'd in the Tower of London by his unnatural Uncle

R I C H A R D III.

The *English Nero*, who to make his way clear to the Crown murder'd, 1. King *Henry* the 6th 2 Prince *Edward* his Son. 3. *George* Duke of *Clarence* his Brother. 4. *Hastings*, a faithful Servant to King *Edward* the 5. 6. *Rivers*. 7. *Vaughan*. 8. *Grey*. Three of the Queens Kindred. 9. *Edward* the 5th Sovereign, with 10. his young Cousin *Richard*. 11. *Henry* Duke of *Buckingham* his dear Friend, and great Coadjutor in these impious practices. And 12. his Wife *Anna*, in order to make way to an incestuous Match with his Cousin *Elizabeth*.

There was at this time, at the French Court, *Henry* Earl of *Richmond*, of the House of *Lancaster*; to him the Crown of England was propos'd with this Proviso, that he should marry *Elizabeth*, eldest Daughter of King *Edward* the Fourth, and thereby unite the 2 Houses of *York* and *Lancaster*. Upon this the Earl makes haste into England and being still re-inforc'd as he march'd he at last encounters King *Richard* at *Bosworth* in *Leicestershire*; in which Battle King *Richard* was kill'd, and the Crown conferr'd upon the Earl.

And thus an End was put to the Wars between the two Houses of *York* and *Lancaster*, which began upon the Intrusion of King *Richard* the Fourth, and in which was fought 12 pitch'd Battles, 2 Kings, 1 Prince, 10 Dukes, 2 Marquisses, 21 Earls, 10 Lords, 2 Viscounts, 1 Lord Prior, 1 Judge, 139 Knights, 100 Esquires, and 84998 private Soldiers were slain. King *Richard* having thus tyranniz'd upwards of 2 Years

H E N R Y VII.

1489

son to *Edmund Tudor*, Earl of *Richmond*, and Grandson to *John* of *Gaunt*, Duke of *Lancaster*, was crown'd King of England.

He call'd a Parliament, in which an Act was pass'd for settling the Crown upon the Person of King *Henry*, and the Heirs of his Body successively for ever.

He first appointed the Band of tall Men to attend him, call'd Yeomen of the Guard, which no King before, but all the Kings and Queens since have kept under that Denomination.

In this King's Reign happen'd that strange Disease call'd the sweating Sickness, which lasted about a Month, and kill'd many Thousands of People, 2 Lord Mayors dy'd of it in one Week.

About this time the Pox was first known in *England*.

In 1491, *Ferdinand* 5th King of *Spain*, took the City and Country of *Granada* from the Moors, which they had been possess'd of above 700 Years, on which account the Pope gave him the Title of the most Catholick King.

Henry the 7th Reign'd 23 Years and 8 Months and was succeeded by his Son

H E N R Y. VIII.

This King began the first Reformation of Religion, banishing the Pope's Supremacy out of *England*, tho' formerly he himself had wrote a Book against *Martin Luther*, for which Pope *Leo* the 10th entitled him Defender of the Faith, &c.

He built *St. James's* House and converted the Meadows about it into a Park, called *St. James's* Park.

In his time Beef and Mutton were first order'd to be sold by weight *viz.* Beef at a halfpenny a Pound and Mutton at three farthings.

The principal Favourite and first Minister of this King was the famous Cardinal *Wolfey*, who built *Whitehall*, and tho' but the Son of a Butcher, rose to greater Power and was invested with more Honours than any Subject of *England* either before or since.

King *Henry* the 8th having reign'd 37 Years, dy'd, and was succeeded by his Son

E D W A R D. VI.

Who pursu'd the Reformation begun by his Father, and in 1548, the Church Service was first sung in *English*.

Having reign'd upwards of 6 Years, he dy'd, and appointed for his Successor the Lady *Jane Grey*, Daughter of the Dutchess of *Suffolk*, who was accordingly proclaim'd Queen of *England*, but

Q U E E N M A R Y.

Asserting her Right, as King *Edward's*, Sister by Queen *Catherina*, the 1st Wife of *Henry* the 8th, and coming to *London* with some Forces was proclaim'd Queen of *England* and crown'd.

A. D.

In her Reign dy'd 3 Dukes, 3 Lords, the Lady *Jane Grey*, and several others who profess'd the Reformation.

In her time a Barrel of Beer with the Cask cost but six Pence and 4 great Loaves of Bread were sold for a Penny.

Queen *Mary* reign'd but 5 Years and was succeeded by her Sister

E L I Z A B E T H.

1556

She again encourag'd the Reformation, which Queen *Mary* had discountenanc'd: she was perhaps the greatest and most powerful Monarch that ever sat on the *English* Throne. She success'd the *Scotch* against the *French*, the *French* Protestants against the *Papists*, and both against the *Spaniards*. She commanded the whole *Ocean*, and destroy'd the *Spanish* Armada, which was thought to be invincible.

In her Reign Sir *Thomas Gresham* built the Royal Exchange.

Tobacco was first brought into *England*. Sir *Walter Raleigh* first discover'd *Virginia*, so call'd by him in honour of his Virgin Mistress Queen *Elizabeth*.

In her Reign liv'd the great Poets *Spencer* and *Shakespear*, likewise Lord *Bacon*, Sir *Philip Sydney*, Sir *Walter Raleigh*, Sir *Francis Drake*, and several other great Men.

Queen *Elizabeth* reign'd upwards of 44 Years, and was succeeded by

J A M E S. I.

1603

Of the Family of the *Stuarts*, (the Name of the *Tudors* existing in Queen *Elizabeth*) King of *Scotland*. He united the Kingdoms of *England* and *Scotland*, which then took the Denomination of *Great Britain*.

He caus'd the Bible to be new Translated from the Original Languages which is the Translation now us'd.

In this Reign the *English* Plantations were first settled in the West-Indies.

In the Year 1605, was a terrible Plague in *London*, of which dy'd near 100000 Persons.

Silk Worms first brought into *England*.

King *James* reign'd 22 Years, and was succeeded by his Son

C H A R L E S. I.

1625

This unhappy King, tho' a weak Man, had some Virtues; endeavouring to extend the Prerogative of the Crown too far, in some Instances exercising an Arbitrary Power, he was us'd by his own Subjects of high Treason against the Laws of *Land*, and after a troublesome Reign of near 24 Years, was headed on a Scaffold before the Gates of his own Palace.

But tho' King *Charles* was generally for extending the Royal Power beyond its legal Bounds, yet in his Reign several excellent Laws were made for the Security of the Subjects Liberties. Partic-

ticularly, in his 3d Year, the Petition of Right was made into a Law, in which it is enacted that no Subject shall be compell'd to any Gift or Contribution to the King, but by Consent of Parliament: Soldiers are forbidden to be quarter'd in private Houses, and martial Law is annull'd. In his 16th Year was pass'd, what was then call'd the Triennial Act, entituled *a Bill to prevent Inconveniencies from long intermission of Parliament*. By this Act if the King should refuse to summon a Parliament at the End of 3 Years, the Chancellor or Keeper might issue out Writs to summon the Peers, and elect the Commons: if the Chancellor or Keeper should neglect this, any 12 of the Peers might summon the Parliament: if the Peers should not send out their Summons, the Sheriffs in Counties, and other Magistrates might cause Election to be made; and if these should omit their Duty, the Electors might assemble themselves and chuse Members.

After the Death of King *Charles*, the Government of *England* was chang'd from Monarchical to a Common Wealth, in which

OLIVER CROMWELL.

Presided by the Title of the Lord Protector, and continu'd to direct the Affairs of the Nation for the Space of 12 Years.

At this Time and in the Preceding Reign, the whole People of *England* were stark Mad with Biggottry and Enthusiasm.

Some time after the Death of *Oliver Cromwell*, the Nation weary with perpetual Changes of Government and Religion, recall'd the Son of their late Monarch, from Banishment, and accordingly on the 23d of *April*

CHARLES II.

Was crown'd King of *Great Britain*. He was a Man of much Wit and Gallantry: and in his Reign the Manners of the People was quite chang'd: for whereas before, it wou'd have been esteem'd prophane and irreligious, even to have eat an Oyster without a long Prayer or a Psalm; it was now thought almost superstitious to believe in God.

In the 5th Year of his Reign happen'd a dreadful Fire in *London*, which in the space of 3 Days burnt 78 Parish Churches and 13200 Houses.

King *Charles* the 2d reign'd 36 Years including the Protectorship of *Cromwel*, and was succeeded by his Brother

JAMES II.

Who endeavouring to introduce the Roman Catholick Religion, was oblig'd to quit his Dominions; which brought about the Revolution under

WILLIAM III.

In which the Civil and Religious Liberties, of the People of *England* were fix'd, upon better Principles and a surer Foundation than they had ever been before.

The GARDENER'S Monthly DIRECTOR.

KITCHEN GARDEN.

JANUARY.

1. IF the Weather be mild, continue to trench your Ground for Spring Crops.
2. On warm Borders near Walls, Pales, or Hedges, sow early Radishes, Carrots, Spinach, Lettuce, and small Salleting.
3. Plant your first Crop of *Windfor* or *Sandwich* Beans.
— Put in some Peas.
4. Make hot Beds for early Cucumbers, Melons and Asparagus. If the plants are already come up, great Care must be taken of them at this season.
5. Sow Cresses, Mustard, Rape, Turnep, and other Sorts of small Sallet Herbs, upon moderate hot Beds.
6. Be careful of the Cauliflower Plants which are under Frames, and pull off all decayed Leaves from them, and in mild Weather give them much Air as possible.
7. Toward the latter End of the Month, (if the Season be mild) transplant some Cabbage Plants of the Sugar-Loaf kind.
Sow the Ground with Spinach before the Plants are planted.
Transplant Carrots, Parsnips, Leeks and Cabbages for Seed.

FEBRUARY.

1. Dig and prepare your Ground.
2. Sow Carrots, Parsnips, Onions, Leeks, Radishes, Spinach and Cabbage-Lettuce.
N. B. Don't sow too much of each Sort at once, but rather sow two or three times at about 10 Days distance.
If the Weather be favourable towards the End of the Month, plant your Cos, Silesia and Imperial Lettuces from where they grew in Winter, but leave some to cabbage because they will be forwarder. And sow some seeds of this Sort upon a Spot of Ground to come after the Winter Lettuces are gone.
3. Continue to plant Beans, and sow Peas every Fortnight, but now sow only the *Windfor* Bean, and sow some of the larger Sort of Pease, especially the *Spanish* Moretto, a good eating Pea.
The Peas and Beans which were sown in Autumn, and have stood thro' the Winter, shou'd have the Ground between them houghed, and the Earth drawn up to the Stems to strengthen them.
4. The Cucumber and Melon Plants which were raised this last Month will now be fit to transplant, so make new Beds and well wrought, but don't put the Plants in till the violent Heat of the Bed is over, which seldom lasts above a Week.
5. Sow small Sallet Herbs on hot Beds or warm Borders.

6. Make moderate hot Beds for sowing some Cauliflower Seed for Summer Plants.

The Cauliflower Plants which were placed under Bell or Hand-Glasses in *October* last, should towards the End of this Month be parted, leaving only one of the strongest Plants under each Glass.

Transplant your Cauliflower Plants out of the Winter Beds to the Places where they are to grow.

7. Plant out some Sugar-Loaf and long sided Cabbages, if last Month was severe.

About the latter end of the Month, sow some Cabbages and Savoy for Winter use.

8. About the latter end, slip your Artichoke Stocks and plant out some of the best.

9. Plant some Kidney Beans upon a moderate hot Bed for an early Crop. *N. B.* The best Sort is the Dwarf *Battersea* Bean.

10. Sow some Celery Seeds on a Bed of rich Earth and in a warm Situation.

11. Sow Scorzonera, Salsify, Beets, Skirrets, Parsley and Corn Sallet with most other hardy Plants, sow them in separate Beds, and after thin them to their proper Distances.

12. Plant Garlick, Shallots, Roccambole, and Cives, as also Onions to draw up for Scallions in *April*.

Transplant Cabbages, Savoy, Leeks, Parsnips, Carrots, and Beets for Seed, if not done in the former Month.

M A R C H.

2. Continue to sow Parsnips, Carrots, Onions, Leeks, Beets, Borage, Broom-sage, Burnet, Dill, &c. but sow them early in the Month, especially if the Soil be dry, but if it be moist, the Middle or latter end will do.

Sow Radishes, Spinach, and young Sallet.

The large kind of Lettuce Plants which have stood the Winter in warm Borders, must now be planted on a more open exposure.

Sow some Seeds of Silesia, Cos, Imperial and other Lettuces in an open Exposure and on a rich Spot to succeed those of last Month's sowing.

3. Put in Beans and Peas to come every Fortnight.

4. If your hot Beds have declined, add a Lining of new Horse Dung round the Sides.

Continue to make hot Beds for Cucumbers, Melons, Purslain, &c. and the beginning of this Month sow Cucumber Melon Seeds to ridge on under Bell or Hand Glasses for your principal Crop.

5. Continue to sow small Sallet Herbs on warm Borders until the latter end of the Month, when they will do better in a more open Exposure.

6. Plant out all your Cauliflower Plants remaining in your Winter Beds, and those which were rais'd the last Month should now be pricked out upon fresh hot Beds, but not too closely cover'd.

7. Sow Cabbages, Savoy, and red Cabbages for Winter use, if not done last Month.

8. Dress your Artichokes, observing to leave only two or three of the clearest and best situated Plants upon each Root to bear, and slip the rest clean off, the best of which may now be planted to make a new Plantation.

9. About the latter end of the Month put in some Kidney Beans in warm Borders, but not in wet Weather.

10. Sow some Celery Seed for a latter Crop.

11. Slip the Off-sets from the old Roots of Skirrets, and plant them in Rows 10 Inches asunder, and 6 Inches distant, and water them in dry Weather till they have taken Root.

12. Sow some Endive to come early in Summer.

13. Sow Sweet-Marioram, Thyme, Hyssop and other tender Aromatick Plants on a dry warm Soil.

14. Slip and plant Mint, Tarragon, Pennyroyal, Cammomile, Baum, Savory, Sage, Rosemary, Hyssop, and most other aromatick Plants which are now beginning to shoot, and will take root better than at any other time.

15. Sow Shardoons upon a Bed of rich, light Earth pretty thin, keep them clear from Weeds, and water them in dry Weather till they are big enough to transplant.

16. About the end of the Month sow Purslain on warm Borders.

17. Sow Turnips on an open spot of Ground to come in May.

18. Sow Fench Seeds in Drills about 12 Inches asunder, scatter the Seeds in them thin, and cover them half an Inch thick with light Earth.

A P R I L.

1. Hough your Crops of Radishes, Carrots, Parsnips, Onions, Leeks, &c. thinning them to proper Distances, cut down all the Weeds, and stir the Ground between them which will be of great use.

Sow some Cos, Silesia and other kind of large Lettuces in a moist Soil, to succeed those sown the former Month.

Transplant some of your Cos, Silesia and other large kind of Lettuces sown the last Month, and water them till they have taken root.

2. Plant Garden Beans for a latter Crop, and continue sowing the Marrow-Fat, and other large kind of Peas, to succeed those sown last Month.

Hough the Ground between your Rows of Beans and Peas, and draw the Earth up to the Stems.

3. In the beginning of the Month, make Ridges for Melons and Cucumbers.

4. Sow young Sallet Herbs every Week, observing, as the Heat of the Sun encreases, to sow them in a more shady Situation, for in Summer they thrive best on a North Border.

5. After a Shower of Rain, draw the Earth up to the Stems of your Cauliflower Plants which were planted either in Autumn or early in the Spring, but take care not to draw the Earth up into their Hearts.

Plant out your Cauliflowers raised in February.

6. Thin and prick out into Beds the Cabbages and Savoy sown last Month, to acquire Strength before they are transplanted for good.

After a Shower of Rain, draw the Earth up to the Stems of your Cabbage Plants which were planted in Autumn or early in the Spring.

7. You may yet slip and plant Artichokes on a moist Soil.

8. Plant Kidney Beans the beginning of the Month in a warm Situation, and in dry Weather.

9. Transplant

20. Transplant your young Celery Plants into Beds of rich Earth about 3 Inches distance, observing to water them duly till they have taken root, don't take up all, but only thin them, taking out the large ones, leaving the Small to gather Strength.

14. Still sow Sweet-Marjoram, Thyme, Summer Savory and other aromatick Plants, which should not be sown too early if the Spring be cold and wet.

15. In moist Weather plant Slips or Cuttings of Sage, Rue, Rosemary, Savory, Mastick, Lavender, Stæchas, and other aromatick Plants, shade them from the Sun and duly water them.

Plant Cuttings of Mint, Tarragon, &c. to make new Beds, the old ones often decaying after they have stood 2 or 3 Years.

Weed carefully your Beds of Mint, Tarragon, Parsley, &c. and if the Season prove dry water them.

17. Sow Purslain on warm Borders.

18. Sow Turnips on a moist spot of Ground, and those sow'd last Month should now be houghed out to proper Distances and the Weeds destroyed.

M A Y.

2. Hough Winter Crops of Onions, Carrots, Leeks, Beets, and Parsnips.

Sow about the end of the Month some brown Dutch and common Cabbage Lettuce for *August* and *September* in an open Situation, sow them thin, and hough them out to proper Distances, and then you need not transplant them.

Transplant Silefia, Imperial, Cos, and brown Dutch Lettuces into North Borders.

3. Sow Peas and plant Beans for latter Crops on a moist Soil.

4. Sow Cucumbers in open Ground to produce Picklers.

5. Sow all Sorts of small Sallet Herbs every 2 or 3 Days.

6. The early Cauliflowers will now begin to appear in the Center of the Plants, so should be look'd over every Day, breaking down some of the inner Leaves of such as appear in Flower.

About the 12th of this Month sow Cauliflowers for Winter use, shade the Beds with Mats and keep the Ground moist.

7. In moist Weather plant out Cabbages and Savoys for Winter use.

The early Cabbages do now begin to turn their inner Leaves for Cabbaging, which may be forwarded by tying your Leaves together with a Withy or Bafs Mat.

9. Plant Kidney Beans for a 2d Crop.

About the latter end of the Month do the same.

10. Transplant Celery into Drills for blanching to come early.

13. Sow Endive for blanching.

15. Plant Slips of Rosemary, Sage, Hyssop, Lavender, Marum, Mastick, and other aromatick Plants, shade and water them till they have taken Root.

17. In the beginning of the Month sow Purslain in the open Ground.

18. Sow Turnips when there is a Prospect of Rain in a short Time, and hough those sown last Month, and leave them 8 or 10 Inches asunder.

19. Sow Finochia in Drills about 18 Inches or 2 Feet asunder, and draw

Draw the Earth up to the Plants which are almost full grown, to blanch them; if sown this Season it must have a light, rich, moist Soil.

20. About the latter end of the Month sow Broccoli for Spring use.

J U N E.

2. Hough and clean Carrots, Parsnips, Turnips, Onions, Leeks, Peas and all other late Crops.

Sow brown Dutch and common Cabbage Lettuce for a late Crop.

Transplant such Lettuces sown in *May* into a shady Situation not under Trees, Walls or Buildings.

4. If you have Ridges of Cucumbers, or Melons, made between your Rows of Cauliflowers, dig all the Ground between the Ridges, and lay out the Vines in regular Order.

Shade the Melons that are new setting with Mats.

5. Sow small Sallet Herbs every 3 or 4 Days.

6. The Cauliflower Plants, which were sown last Month for Winter use, prick out into rich Beds, shade and water them till they have taken Root.

Clear and hough the Ground where the early Cauliflowers grow.

7. About the Beginning transplant Cabbage and Savoy Plants for Winter, either on an open spot or between Rows of Beans and Cauliflowers, &c. so by putting one Crop to succeed another, one acre will produce more than 2 or 3.

9. Plant Kidney Beans to succeed those planted in *April*.

Transplant Celery into hollow Trenches, for blanching at about 4 or 5 Inches between each Plant, and the Trenches 3 feet asunder.

13. Transplant Endive in an open moist spot of Ground, for blanching, allowing 12 Inches Distance each way.

Sow some Endive-seed for a latter Crop.

14. Prick out young Plants of all Sorts of sweet Herbs, which were sown in *March* as Thymes, Hyssop, sweet Marjoram, and also Clary, Burnet, Sorrel Marigolds, &c. and allow them room enough.

15. Still make slips of Sage, Rosemary, Stæches, Lavender, Hyssop, Winter Savory, and other aromattick Plants, but this is better done earlier.

18. Sow Turnips on moist Ground, and when there is a prospect of Rain.

19. Sow Fenchia to succeed that sown last Month, for in hot Weather this Plant will not remain good above 2 Weeks.

Thin the Fenchia Plants sown last Month, and allow them room enough.

20. At the beginning sow some broccoli Seed for a 2d Crop.

The Broccoli which was sown in *May*, prick out into Beds at about 3 Inches asunder, for if they grow in the Seed-bed too long, they draw up weak and never produce so good heads as those whose Stems are short and strong.

21. In dry Weather gather Seeds of all Sorts that are ripe, spread them on Mats or Cloths to dry.

22. Gather Herbs for drying, of such Sorts as are now in flower, and hang them in a dry shady Place, which dries them better than the Sun.

KITCHEN

J U L Y.

2. About the middle sow spinach for Winter use, as also Carrots, Coleworts, and Onions for Spring use.
 3. Pull up Stalks of Beans and the Haulm of Peas and other Leguminous Plants that have done bearing.
 4. The Melons which now begin to ripen should have but very little Water given them, for the Fruit will be the better, tho' not so large.
 5. Sow all sorts of small Sallet Herbs.
 6. Clean the Ground where the Summer Cauli flowers grew. Plant out Cauli flowers for Autumn.
 7. Transplant Cabbages and Savoy for Spring. Pull up Cabbage Stalks.
 8. Clear the Artichokes planted last Spring from Weeds, and all other Crops, that they may have full Liberty to spread.
 9. At the Beginning sow your last Crop of Kidney Beans, where they may be defended from Morning frosts in Autumn, for this Crop will continue bearing till *Michaelmas*. If the Ground is very dry soak the Beans 6 or 8 Hours.
 10. Plant Celery into Drills for Blanching (if the *Italian* Sort, but if Turnip rooted, level Ground is best) Earth that up planted in *June*.
 12. Pull up Onions, Garlick, Roccabole, Shalots, &c. when their Leaves begin to wither, and spread them thin in a dry airy Place.
 13. Plant out Endive for Blanching. Tye up Endive which is full Grown, to blanch and always do it in dry Weather.
 21. Gather Seeds of all Sorts that are ripe, cutting off their Stalks and spread them on Mats or Cloths in a dry airy Place to harden.
- N.B. In dry Weather observe to Water all lately transplanted Plants, and always in an Evening.
- Transplant *Bioccoli*.

A U G U S T.

2. At the Beginning sow Onions for Spring Sallets, and sow some *Welch* Onions at the same Time, for they will endure the Cold better but they are stronger tasted.
- Sow Spinach for Winter and Spring, the best Sort to endure the Cold is the prickly Sort.
- Keep all the Winter Crops, as Parsnips, Leeks, Beets, Cabbages, &c. clear from Weeds.
- About the middle sow some Cabbage, and Dutch brown Lettuce on warm Borders to stand the Winter.
- About the 20th sow some *Silesia*, *Cos*, and other large Kinds of Lettuces, to plant under Glasses or upon Beds to be cover'd in Winter, to come early in Spring.
- Transplant some of the Lettuces sown the former Months for Autumn, and in a warm Situation, and water them till they have taken Root.
- Weed your Beds of Coleworts, sown last Month, and if the Plants are very thick, draw out some into another spot.
4. Keep the Roots of the Melons from too much wet.
5. Sow all sorts of small Sallet Herbs every Week.

About

6. About the 10th or 11th sow some Cauliflower-Seed, for the early Crop to be planted under the Bell or Hand-glasses, and under the Walls where they are design'd to stand open.

Also sow some more about the 14th Day for a 2d Crop, to Plant under Frames to abide the Winter.

7. About the 5th or 6th sow the early Battersea Cabbage-Seed.

Still transplant some Savoys.

8. The Artichokes planted last Spring will now begin to show their Nit, so cut off all small Suckers on the Sides and clear them from Weeds.

9. In moist Weather transplant Celery for blanching which must be well water'd.

In dry Weather, Earth up your Celery which is large enough.

Continue to transplant Celery into Drills for succession.

12 Pull up Onions, Garlick, &c. when the Leaves begin to wither.

13. In moist Weather transplant Endive, which must be well water'd.

Tye up the Endive which is full grown to blanch, and do it when the Leaves are dry.

14. Cut off the flowering Branches of most Sorts of aromatick Plants, Lavender, Rosemary, Savory, Hyssop, &c. that they may make new shoots before Winter, but don't do it in dry Weather.

15. Plant Slips of Sage, Rosemary, Stachas, Lavender, Mastick and other aromatick Plants, if omitted in Spring, but Spring is best.

19. Earth up the Fenchia, which is full grown to blanch.

20. Transplant your Broccoli (planted out the former Month) into the Place it is to remain for flowering, and water it only till it has taken Root, Plant them in Rows about 2 feet asunder and about 1 foot apart from each other.

22. Cut such Herbs as are now in flower, to Distil or dry for Winter.

23. About the latter End, sow several sorts of Seeds which remain in the Ground, which if sown in Spring do often miscarry as Chevil, Angelica, Lovage, Masterwort, Scurvey-grass, Fennel, Alexanders, Sweet Sefeli, &c.

N. B. Clear your Dunghills from Weeds.

S E P T E M B E R.

2. Hough and clean Spinach which was sown last Month, cutting out the Plants where they are too close, and if possible do it in dry Weather. Weed the Onions, Carrots and Coleworts which were sown last Month.

In moist Weather transplant the Coleworts which were sown in May into the Places where they are to remain till Spring.

About the latter End transplant Lettuces of several Sorts upon warm Borders, where they may remain to Cabbage early in Spring, they may be planted pretty close together.

3. At the End plant some Beans and sow some early Peas on warm Borders.

5. Sow small Sallet-herbs, but as the cold increases they should have warmer Situation.

6. At

6. At the beginning prick out the Cauliflower plants sown last Month, placing them either on old Cucumber-beds or Melons. If the Season proves cold, and their Plants are backward, make some new Beds with warm Dung, and plant the Rows 3 Inches under, and 2 Inches distant.

If the Season proves dry, water their late Crop of Cauliflowers, which are to come next Month.

If there should happen much Rain at this Season, you must protect the Cauliflower Plants from it.

7. Weed your Cabbage-plants which were sown last Month.

Transplant the Cabbage-plants sown the Beginning of *August*.

10. Earth up Celery as it advances in height, and always do it in dry Weather.

13. Transplant some of your late sown Endive, on borders under warm Walls, to stand till *February* before it is blanch'd, and in dry Weather tye up some to blanch.

14. At the Beginning you may safely transplant most Sorts of perennial aromatick Plants as Rosemary, &c.

16. Draw the Earth up about Chardoons to blanch and do it in dry Weather.

N. B. Keep all the late Crops clear from Weeds, and in dry Weather hough and clear the Ground from Weeds where the Summer crops are entirely clear'd off.

O C T O B E R.

2. Weed the Spinach, Carrots, Onions, &c.

Weed the Beds of *Wells* Onions, for tho' their Blades will entirely decay, yet in 6 Weeks or 2 Months they come up again very strong.

Plant out some of the Colewort Plants, late sown, where they are to remain for Spring.

Sow some Radishes upon warm Borders for Spring, and mix some Carrot-seed with them for if the Radishes are destroyed the Carrots may stand and come early in *May*.

Transplant the brown *Dutch* and common Cabbage, Lettuces, upon warm Borders and near Walls, &c. as also some Cos, Silensia, and imperial Lettuces, but it will be proper to Plant these Sorts on Beds to be cover'd with Frames and Mats in Winter.

3. Plant Beans and sow Peas on dry Ground and in warm Situations which should be repeated twice at the beginning and at the end of the Month.

5. Sow all small Sallet Herbs on moderate hot Beds, either under Frames or arch'd over with Hoops, to be cover'd with Mats or Cloths.

6. About the Middle transplant your Cauliflowers into their Places where they are to abide the Winter, some should be put under Bell or Hand-glasses, 2 under each, if both live till Spring one may be planted out.

The Cauliflowers sown in *May*, will now begin to shew the Heads so break down the inner Leaves.

7. Transplant your Cabbage-plants out for good which were sown the beginning of *August*, (especially the early Battersea,) but it will be proper to have some Plants in a warm Situation, as a Reserve.

8. At the End of the Month, cut down the shoots of the Artichokes close to the Surface of the Earth, and trench the Ground, between them

them, and lay a good Ridge of Earth over each Row of Plants, but lay no new Dung about them, but where the Ground wants Amendment, bury some very rotten Dung between the Rows when you trench the Ground.

10. In dry Weather Earth up Celery to blanch.

13. In dry Weather draw up some Endive which is full grown, plant down on the Sides of Ridges to blanch.

15. Make some moderate hot Beds, to plant Mint and Tansey upon.

16. In dry Weather earth up Chardoons to blanch.

20. Earth up the Stems of Brocoli Plants, but take care it be not drawn into their Hearts.

N O V E M B E R.

1. Dig and trench Ground, and Dung that design'd for early Crops, laying it in Ridges, till you make use of it.

2. About the beginning sow some Carrots and Raddishes on warm Borders to come early in Spring, if you did not do it last Month, but if you did, you may defer doing it till the Middle.

Weed your Spinach, Onions and other Crops sown in *July* and *August*, give your Lettuce under Glasses, &c. as much Air as possible.

Take up the Roots of Carrots, Parsnips, Potatoes, &c. About the End of the Month. and lay them in Sand.

3. Sow Peas and Plant Beans in dry Weather, and draw some Earth to the Stems of those that are come up.

5. Sow all Sorts of small Sallet-herbs on moderate hot Beds.

6. In mild Weather let your Cauliflower Plants and Lettuce that are under Frames or Glasses, have as much Air as possible.

Pick all decay'd Leaves from your Cauliflowers, and draw some Earth up to them.

8. Trench your Ground between your Artichokes and lay a Ridge of Earth over the Roots, equally on your Sides and Tops.

13. In dry Weather take up your Endive, which is full grown and lay it in Drenches to blanch, and place it on the Sides of the Ridges that the wet may run off.

D E C E M B E R.

1. Carry Dung into the quarters, spread it and trench up the Ground by the Earth in Ridges that it may be mellowed by the Frost.

2. Sow some Radishes, Carrots and Lettuce, on warm Borders near Walls.

3. About the latter End, Plant some sandwich Beans, which are harder than the Windfor Kind, and will be very proper to succeed the *Spanish Lisbon* Beans, planted the former Months.

About the middle, if Weather be mild sow some early Peas on warm Borders.

Observe to draw some Earth up about the Stems of those Beans and Peas already come up.

6. In mild Weather uncover your Cauliflower Plants every Day, that they may enjoy the free Air.

8. If the Season be mild, Earth up those Artichokes, which were neglected the former Month, and bury a little rotten Dung in the Ground.

N. B. Pick Snails out of old Walls.

G

FRUIT

FRUIT GARDEN.

J A N U A R Y.

1. **I**N mild Weather prepare Borders, design'd to be planted next Month, and repair the Borders about old Fruit-trees (which want amendment,) with fresh Earth and well rotted Dung, but if the Trees are old the whole should be amended to 10 or 12 feet from the Stem (if possible) that the young Roots may receive Nourishment therefrom.

2. Cover the Roots of all new planted Trees with Mulch if it be not done, or if it hath wasted.

3. Cover the Fig-trees with Mats or Reeds to preserve their tender Shoots.

4. Cut all dead or canker'd Branches from your standard Fruit-trees, as also all such as cross each other, and are ill placed, and make the wounded part sloping, and as smooth as possible.

5. If Season be mild, prune dwarf Trees, and any hardy Sort of Fruits, as Pears, Apples, and Vines, but Stone-fruit let alone till next Month.

6. Mend and repair all your decay'd Espalier, plash and tye your Fruit-trees with small osier Twigs, and train your Branches regularly at proper Distances, and don't fasten them to close with the Twigs.

7. Yet plant Straw-berries and Raspberries, tho' Autumn would have been better, especially if the Soil be dry.

F E B R U A R Y.

3. Uncover your Figg-trees in warm Weather and give them fresh Air, to keep them from growing Mouldy.

5. Continue to prune such of your Fruit-trees as were not before pruned, either against Walls, Espalier or Standards beginning with the more hardy Sorts.

6. If your Espaliers were not repair'd the last Month, defer it no longer, because the Fruit-trees are budding out, and will be in danger of rubbing off, and train your Trees so to the Espaliers, that when their Leaves come out, there may be no Confusion.

8. Transplant all Sorts of Fruit-trees, this being the most proper Season, for moist Land, work the Ground well, and break the Clods, that the Earth may better joyn to every part of the Roots, leave the Heads on till they begin to push.

9. At latter End, if Season be mild, graft Pears, Cherries and other hardy Kind of Fruits, and let them be well clay'd, that the Wind don't enter the Graft.

10. In moist Weather clear your Fruit-tree of Moss with an Iron Instrument, shaped like a Hough, and hollowed in the Middle, to the Sizes of the Branches that are to be scraped, 3 Sizes will be sufficient.

M A R C H.

5. Now finish pruning all your tender Sorts of Fruit-trees, as Peaches, Apricocks, Nectarines, &c. For your Buds by this Time, if the Spring has been mild will be very turgid and in danger of being rubb'd off by Nailing the Branches.

Dig the Ground about the Roots to loosen it and destroy the Weeds. When the Trees are in Blossom, Weather sharp, and Nights frosty, cover them with Mats, &c. but take them off at all Times when the Weather is mild.

In dry Weather it may be proper to sprinkle some Water gently over the Branches of your Fruit Trees, especially in mild Weather.

7. Dress and fresh Earth your Strawberries, pulling off their Strings and clearing them from Weeds.

Dig between your Rows of Raspberries and make your Ground clean (not done before) and loosen it to make the Roots penetrate the better.

8. Yet transplant Fruit Trees on a moist Soil, but if your Ground be not ready by the middle of the Month, take them up, prune their Roots, lay them in the Ground and cover your Roots and Stems with Sitter, till you are ready.

Head down your Fruit Trees planted last Autumn to 3 or 4 Eyes, but don't disturb their Roots.

11. Dig and clean the Ground between your Gooseberries and Currants which will strengthen their Blossoms, encourage the Trees and add a neatness to the Place.

A P R I L.

3. In the middle of the Month uncover your Fig-Trees, but do it by degrees.

6. About the end of the Month look over your Walls and Espaliers of Fruit Trees, training in the regular kindly Shoots, and displace all Fore-right and luxuriant ones.

7. Water your young Fruit-Trees in dry Weather, and if you observe their leaves to curl, water them gently all over, do the same to old Trees, but don't do it in the Heat of the Day, nor late in the Evening. Keep your Borders clear from Weeds.

8. Weed your Strawberries, and if the Season proves dry water them.

12. Plant Cuttings of Vines in the Places where they are to remain, always with a Knot of old Wood to the Bottom of each, and bury them in the Ground, so that the uppermost Eye may be seen with the Surface.

Look over your Vines against the Walls, rubbing off all small dangling shoots now beginning to push out, and now a great many may be look'd over in a short Time.

Keep your Ground clear between your Rows of Vines in the Vineyard, and fix the Stakes to them, and fasten the Branch thereto, which is better than to let the Stakes remain all the Winter, when they are not wanted.

13. You may now thin your Apricocks where they are too thick, and the sooner the better.

M A Y.

6. In the beginning of the Month look over your Wall and Espalier Trees, and displace foreright Shoots, and such as are luxuriant and ill-placed, and train such kindly Branches as you would preserve regularly to the Wall or Espalier.

8. If the Season be dry refresh with Water all such Trees as have lately planted, and sprinkle the Water over all their Branches.

Keep the Borders about the Fruit Trees clear from Weeds and strong growing Plants.

12. Look carefully over your Vines, and stop such Shoots as have Fruit at the 2d or 3d Joint beyond the Fruit, and train the Branches close to the Wall; but such Shoots as are design'd for bearing the succeeding Year, don't stop till the next Month; rub off all weak trailing Branches.

About the Middle of the Month do the same to the Vineyard, and train the Branches and fasten them to the Stakes.

13. Where Apricocks and Peaches are too thick, thin them, the beginning of this Month, observing never to leave 2 or more Fruit together for tho' there be but a small Number on the Trees, they will be larger and better flavoured, and make the Trees stronger for succeeding Years.

J U N E.

6. Look over your Wall and Espalier Trees again, and rub off all foreright, ill placed or luxuriant Branches, and train the others regularly at equal Distances to the Wall or Espalier, but be not too officious with the Knife, nor pull any Leaves from the Branches.

8. In dry Weather water such Trees as were transplanted the former Season, and keep Mulch upon the Surface of the Ground about their Roots.

Fasten those Shoots which have been produced.

12. Your Vines should now be look'd over again, and the loose Branches must be fastened to the Wall, and all Side Shoots or weak trailing Branches must be entirely displaced.

The Vineyard should also be thus managed at this Season, fitting the Shoots to the Stakes in a regular Order.

13. Where Peaches and Nectarines have been left too close together when they were thinn'd, they should now be taken off, and not let them grow nearer than 4 or 5 Inches apart.

J U L Y.

6. In the beginning of the Month, look carefully over your Wall and Espalier Trees, rubbing off all foreright Shoots that are produced, and train in all such regular Shoots as are design'd to remain close to the Wall or Espalier in the due Position.

8. Clean your Borders near your Fruit-Trees.

Cut off all Suckers that arise from the Roots of the Trees as they are produced.

12. Look carefully over the Vineyard, and displace all dangling Shoots and wild Wood.

A U G U S T.

6. When any Branches of your Trees project from the Wall or have been displaced by Winds, &c. let them be carefully fastened to the Wall in their due Position, that the Fruit may receive the Benefit of the Sun to ripen it. But do not pull off the Leaves.

12. Your Vines in the Vineyard and those against the Walls, should now be gone over for the last Time, pulling off all trailing Branches which have been lately produced, and fasten those Branches which are loose in their proper Places.

S E P T E M B E R.

5. You may begin to prune Cherries, Peaches, Nectarines, Grapes and Figs at the end of the Month, especially if their Wounds will heal before cold Weather comes on.

7. Transplant Strawberries and Raspberries about the end of the Month, if the Weather proves moist, otherwise defer it till next Month.

8. About the latter end of the Month, you may safely transplant most Sort of Summer Fruit-Trees, altho' their Leaves have not yet fallen, such as Cherries, Nectarines, Peaches, Summer Pears, and Apples.

11. Transplant Gooseberries and Currants about the end of the Month, if the Weather proves moist, otherwise defer it till next Month.

14. Your Fruits should now be gathered as they ripen, but towards the latter end of the Month, most sort of Winter Fruits will be fit to gather, but let them remain as long on the Trees as the Weather will permit, for gather'd too early, their Skins will shrivel, and the Fruit will not keep well, and there will be no Danger of them suffering on the Trees till the Mornings begin to be frosty, when you must not let the Fruit hang any longer.

Observe to gather your Fruit when the Trees are perfectly dry, or your Fruit will not keep.

O C T O B E R.

5. About the beginning, Prune Peach Trees, Nectarines, Apricocks, and Vines which is much better done at this Time than to stay till the Spring, because the Wounds will heal over, and the Blossom Buds be better nourished, for when the Shoots are left to their full Length till Spring, the Buds on the upper Part will be larger than those on the lower Part, which are those design'd to be left in pruning.

You may now continue to prune Pears, Apples, and Plums, till the Middle or latter end of next Month, as the Season proves favourable, but never do it in frosty Weather.

7. Plant Raspberries and Strawberries for they will produce Fruit next Summer.

Dress your Beds of Strawberries, clear them from Weeds and cut off their Strings, and spread a little fine Earth over the Beds, but don't bury the Plants.

Clear the Raspberries of old Wood and dig up the Ground between the Rows.

8. If your Soil be dry, transplant all Sorts of Fruit Trees, but don't head them down till Spring.

11. Plant Gooseberries and Currants, for they will produce Fruit next Summer.

Prune your Currant Bushes, and tie up their Branches with a Withy, and

and dig the Ground between them and plant Coleworts or Cabbage Plants to remain till Spring.

Prune the Gooseberry Bushes.

N O V E M B E R.

5. If the Season be mild still prune Pear Trees, Apple Trees, Vine and other hardy kind of Fruit Trees, either against Walls, Espaliers, or Standards, but don't do it too late in the Month, for fear of Rain and Frosts.

3. Divest your Figg Trees of all their late Fruit, and nail the Shoots close to the Wall, and plant some Pannels of Reeds before them, if the Frost be very severe.

7. Plant Strawberries and Raspberries if the Weather be mild.

8. Clear your Strawberry Beds from Weeds and Runners as last Month.

8. About the Beginning transplant Fruit Trees on a warm dry Soil if Weather is mild, but last Month is better.

Such Fruit Trees as were planted last Month for Standards, should be carefully shaked, and those against Walls or Espaliers fastened thereto.

11. Plant Gooseberries and Currants, if Weather be mild, and dig between the Rows, clear the Ground from Weeds, but first prune the Trees that three may be no Litter afterwards.

14. Your fine Winter Pears and Apples gather'd last Month, now pack up close in Baskets with Wheat Straw, and placed where the Frost is too much Air can get to them, or they will perish in a short Time.

D E C E M B E R.

1. If the Season be mild, prepare your Ground for planting Fruit Trees in February, and mend the Borders of your Fruit Garden with some fresh Earth and rotten Dung well mixed to encourage the Trees.

2. In frosty Weather cover the Ground about your new planted Trees with Mulch.

4. Cut all dead Wood out of your Trees, and such Branches as cross each other, make the Wound sloping and as smooth as possible.

5. Don't prune this Season.

F L O W E R G A R D E N.

J A N U A R Y.

1. IN frosty Weather cover your Beds of Ranunculus's, Anemonies, Hyacinths and other choice Flowers, if they are not come up with Peas-Haulm or some other light Covering which will admit the Air but if they are come up, arch them with Hoops and cover them with Mats or Cloths, and in mild Weather give them as much Air as possible.

2. In mild Weather plant such Roots of Ranunculus's, Anemonies and Tulips as were kept out of the Ground to retard them; but this must be done when the Earth is over wet.

3. Cover all Pots and Tubs of seedling Flowers in hard Frosts and great snows, especially the seedling Hyacinths, Persian Iris's, Spring Cyclamens and other bulbous rooted Flowers.

4. About the End, if the Season be mild, pick off all decayed Leaves from the Auricula's, and take the Earth out from the Tops of the Pots, as low as you can without disturbing the Roots, and fill them with fresh, rich Earth, shelter the Pots from Frost, and give them as much free Air as possible, and let them have the Benefit of moderate Showers.

5. Guard your choice Carnations from heavy Rains, and give them as much free Air as possible.

6. Turn over your Heaps of Compost, that the Frost may mellow them and break the Clods, for the oftener they are turned the sooner they may be used.

Make new Parcels for a constant Supply, for without this, there is no hopes of choice Flowers.

About the latter End, provide new Dung, let it be thrown on an heap and kept warm, to make hot Beds to sow the choicest sort of annual Flowers.

F E B R U A R Y.

1. In dry frosty Nights, cover your Beds of choice Ranunculus's, Anemones, and Tulips.

3. Yet sow Auricula and Polyanthus Seeds in Tubs of light, rich Earth, placing them where they may have the Morning Sun, till April, when they must be moved to a more shady Situation.

4. If your Auricula's were not fresh earth'd last Month, do it this.

5. If the Weather be mild, plant out your choice Carnations into the Pots where they are to flower, and don't take too much of the Earth from their Roots, and when planted, keep them in a warm Situation, but not too near Walls, &c. and arch them over with Hoops to cover them from bad Weather.

7. Transplant Canterbury Bells, French Honey-Suckles, Daizies, Rose Campions, Fox Gloves, Pinks, Sweet William, Perennial Catchfly, Campanula's, Thrift, Scarlet Lychnis, Columbines, Starwort, Golden Rods, with many other fibrese rooted Plants into the Borders of your Pleasure Garden, where they are design'd to flower; but this is better done at Michaelmas.

8. Make hot Beds for your tender Annals, as the Amaranthus.

Amaranthoides, double flowering Stramonium, double striped Balsamine and some others.

9. Plant some Taberose on a hot Bed; if you did not do it last Month.

10. Transplant all Sorts of hardy Trees and Shrubs, as Lilacs, Laburnums, Bladder and Scorplan Sena, Roses, Honey-Suckles, Jasmynes, and most Sorts of Forrest Trees: Ever-Greens not till April, when they are just ready to Bud.

11. Plant Dutch Box-Edgings, but September is a better Season, because it will be firmly rooted before the Drought of the Spring comes on.

12. Break up your Gravel Walks and turn them, but do not rake them till the middle of next Month, then they will be well settled.

13. Stir the Surface of the Ground of your Flower Beds, and clear them from Weeds, Moss, &c.

1. Year

M A R C H.

1. Your choice Hyacinths, Ranunculus's, Anemonies, and Tulips should be carefully cover'd with Mats or Canvas in bad Weather.

3. Plate your Boxes and Pots of seedling Auriculas's in a dry Situation.

4. Take care of your Pots of choice Auricula's, and protect them from blighting Winds, and frosty Nights, and refresh them now and then with water in dry Weather, but let no wet get to the Center of the Plant.

5. Give fresh Earth to the Carnations, which were planted out in good at *Michaelmas*, and pick off all decay'd Leaves.

7. Transplant most Sort of fibrose rooted Plants, as Carnations, Pinks, sweet Williams, Rose Campion, Lychnis, Thrift, Asters, garden Rods, perennial Sun-flowers, Canterbury Bells, Peach leaf Bell flower, French-honey Suckle, Daizies, Bupthalmums, Leucanthemums, Columbines, Hieraciams, and many other Sorts, tho' if the Soil be dry, it would be better done at *Michaelmas*.

Sow in your flower Nursery, the Seeds of many biennial and perennial Plants to supply the Borders of your Flower-garden the following Year as Columbines, Canterbury-bells, French-honey Suckles, stock Gilly-flowers, sweet Williams, &c.

5. 2. Sow your choice Carnations and Pink-seed, but not too deep in the Ground, and Place the Pots to have the Morning Sun.

1. 2. Plant some Roots of common double Anemonies to flower late, if the Season prove dry refresh them now and then with Water.

8. Make fresh hot Beds, for your choice Sorts of Annuals which were sown the former Month, and let the Earth be very good, and when the heat is moderate, put them in, and give them Water as they shall require, and the Amaranthus's, &c. will be very large.

10. About the End of the Month, Season mild and inclinable to wet, transplant most Sorts as ever Greens as Hollies, Yews, Phyllirea, Alaternus's, Lawrels, Bays, Laurustinus's, &c. observe to cover the Ground with Mulch, if cold North or East-winds blow, defer it till next Month.

13. Stir the Earth of your Borders and Beds of Flowers which were planted at *Michaelmas*, with a narrow Trowel, and take care of injuring the Roots.

7. 2. Pick all dead Leaves and filth, out of your Pots of double Rose Campions, Campanulas's, Scarlet Lychnis's, &c. which were planted out at *Michaelmas*, and take out the Earth from the Tops of the Pots, and refill them with fresh rich Earth.

About the latter End sow Seeds of all hardy Annuals in Borders as Flos Adonis, Venus looking Glass, Venus Navelwort, sweet scented Peas, Tangier Peas, Lobels catch Fly, Dwarf Lychnis, Dwarf annual Stock, Candy Tuft, Oriental Mallow, Lavateras, Ketmia Vesicaria, Convulvulus minor with many others, sow them thin in little Patches where they are to remain.

15. On a moderate hot Bed sow Marvel Peru, French Marrygold, female Balfamine, Love-apple, African convulvulus Major, Capsicum, Indian Pink, Stramonium, sweet Sultan, &c.

16. Sow the Seeds of Firs, Pines, Bays, Cedars, Arbutus, Alaternus's, Phyllireas, &c. where they may be exposed only to the Morning Sun.

A P R I L.

1. Cover your Beds of fine Ranunculus's, Anemonies, Tulips, and Hyacinths, which are now in flower, with Mat or Cloths, to defend them from wit and the heat of the Sun, which will preserve them much longer in their Beauty, but open them every Morning and Evening.

3. Screen your Tubs of seedling Auriculas, and Polyanthus's from the Sun.

4. Remove the Pots of fine Auriculas under cover, which now begin to shew their beautiful Flowers, and preserve them from wet, which would wash the Mealliness from off your Flowers, wherein consist great part of their Beauty, and defend them from the heat of the Sun, and let them have as much fresh Air as possible.

Set sticks to your Carnations, which now begin to shoot up their bindles for blowing.

7. Sow most Sorts of hardy perennial and biennial Plants, as were sown the former Month, as Canterbury Bells, Columbines, &c.

8. Now make fresh hot Beds, for transplanting your tender Annuals, as Amaranthus, Amaranthoides, double striped Balsamine, &c.

9. Put some more Roots of Tuberoses into a moderate hot Bed.

10. Transplant most Sorts of Evergreens, if there is a prospect of Rain, if not Plant them in Batter and make a Pan and water them twice a Week.

Where Phyllireas, Alaternus's, Laurels or other hardy ferver Greens, are grown rude, cut the Brances close to the Stems, and when they root, they may be train'd as you please.

12. Rake, Level and Rowl your Garden walks, which were turned up last Month.

13. Clean the Borders and tye up all your tall growing Plants.

14. Sow such Annuals in your Borders as do not require an artificial Heat, as Venus looking Glass, Lupines, &c.

15. In the beginning make some slender hot Beds, to sow such Annuals as require a little warmth, but are rais'd better under Mats than Glasses, as the African and French Mary-gold, Convolvulus Major, Balsamines, Marvel of Peru, sweet Sultan, Indian Pink, &c.

17. About the latter End, take up the Roots of Saffron, Calchicums, and such other Bulbous rooted Flowers as blow at Michaelmas, whose leaves are now decaying, these must be planted again in July.

M A Y.

1. Shade your choice Ranunculus's, Anemonies, and Tulips, and other curious Flowers now blowing. v. 18.

At the beginning take up your choice Hyacinth-roots which are just flowering, and lay them Horizontally in a Bed of Earth to ripen, leaving their Leaves and Stems out of the Ground to decay.

3. Remove your Pots of seedling Iris's and other bulbous rooted flowers, into the Shade, if not done in April, where they must remain till Autumn.

4. Put

4. Put your Auricula's, which are now past flowering into a shady Situation.

5. Tye up the Spindles of Carnations, divesting them of all side Pods, and also stick and fasten the Stems of all tall Flowers.

Place your Pots of choice Carnations upon the Stage to protect them from Vermin.

7. Transplant such Biennial and Perennial Flowers, as were sown in the flower Nursery in *March* and *April*, into Beds of fresh Earth in the Nursery, where they may remain till the latter End of *August* or beginning of *September*, when they must be removed into the Borders of the flower Garden as Canterbury-Bells, French honey Suckles, sweet Williams, Pinks, Columbines, &c.

8. Make a fresh hot Bed for your Amaranthus's double flowering Balsamine and other tender exotic Annuals, and put them into large Pots of good Earth, placing them upon the hot Bed, and fill up the Interstices with Earth.

9. Plant in some Tuberose Roots on a moderate hot Bed to succeed those planted in *March* and *April*.

14. 15. About the middle Plant out your hardy Annuals as Marigold of Peru, sweet Sultan, French and African Marygold, female Baldermine, Capsicum, brown Jolly, &c.

Sow dwarf Annuals in Patches upon the Borders of the flower Garden, as Candy Tuft, Venus looking Glass, &c.

The young Plants of Venus Mallow, Oriental Mallow, and Lavatera's may now be planted into the Borders of the flower Garden, but don't do it in moist Weather.

17. Take up the Saffron-roots, whose Leaves are by this Time decayed. and spread them on Mats in the shade to dry, after which they may be kept in Bags until *July*, when it will be a proper Season for planting them again.

18. About the latter End take up early Tulip-roots and some forward Anemonies, if their Leaves are decay'd, after which they should not remain in the Ground.

19. Transplant stock-gilly Flowers, Wall-flowers, seedling Pinks, Carnations, and other perennial seedling Flowers.

Sow some Seeds of annual scarlet and purple stock-gilly Flowers.

J U N E.

1. Take up your Hyacinth-roots, out of the Beds where in they were laid the former Month to ripen, and clean them from filth, laying them on a Mat in a shady Place, then put them into Drawers or Boxes, where they may enjoy the free Air.

5. Lay down your Carnations, Pinks, double sweet Williams and such other fibrose rooted Plants as are propagated by Layers, water them very gently as soon as done, and repeat it frequently.

Your Carnations which begin to break their Pods, should be opened in 2 or 3 different Pots that their Flowers may expand equally on every Side, Cover them with Glasses, soon after their Pods are open, to screen them from Mixture and the heat of the Sun, and look carefully after Earwigs and Ants.

7. Transplant such Sorts of Biennial and Perennial Fibrose rooted Plants, as were not done the former Month, into nursery Beds, where they should be allowed room enough to grow till Autumn.

Plant Cuttings of Lychnideas, double sweet Williams, double scarlet Lychnis, Pinks and such other fibrose rooted Plants as you want to increase, which if planted in a Bed of light rich Earth, shaded and duly water'd will take Root very well.

8. 14. 15. Transplant annual Flowers out of hot Beds into the Borders of the flower Garden as Capsicums, Balsamines, Convolvulus's, Apple Apples, African and French Mary-golds, Amaranthus's, Indian Pinks, &c. do it in a cloudy Day or in an Evening, and give them some Water to settle the Earth to their Roots.

Take up the Roots of Tulips, Anemonies, and Ranunculus's whose leaves are decayed, and spread them on Mats, in a shady Place to dry, then clean them, and put them up in a Box or Bag.

Take up and transplant the Roots of Cyclamens, Fritillarias, Dens Canis, Saffron, Narcissus's and such other bulbous rooted Flowers, as will not succeed well if their Roots are kept any time out of the ground.

10. Cut off the Stalks, of such Flowers as have done blowing.

J U L Y.

1. Plant your seedling Auriculus, which came up last Spring into Pots or Tubs, with rich Earth, and placed in a shady Place.

2. Keep your choice Auriculas clear from Weeds, and pick off all decay'd Leaves.

3. Continued to make Layers of Carnations, Pinks, sweet Williams, (if not done before) but the sooner this is done the better.

Your choice Carnations, being now in Flower should be carefully attended, to open the Pods when they begin to burst, on the contrary Side, that they may blow equally, and cover them with Glasses or Basons.

Towards latter End take off the Layers of Pinks, Carnations, sweet Williams, &c. which have taken Root, and Plant them either in Pots or Borders of good fresh Earth, where they may continue, until you see the conveniency of planting them, where they are to remain for spring.

4. Transplant such Biennial and Perennial fibrose rooted Flowers, as were sown late in the Spring, as Pinks, Carnations, Stock-gillyflowers, Wall-flowers, Holly-hocks, French-honey Suckles, Canterbury Bells, &c. which should be planted into nursery Beds, where they may have Room to grow till Michaelmas, when they should be transplanted into the Borders of the Flower-garden.

You may now increase the double scarlet Lychnis by planting cuttings in a shady Border of Light, fresh Earth, refreshing them with water, according to the dryness of the Season.

5. Clip Box Edgings; cut and trim Hedges.

6. Clean the Borders from Weeds, especially such Sorts as shed their

7. Take up the Roots of such late Flowers, as were not fit last year, as Ornithogalums, white Lillies, Martagons, and some other

Trans-

Transplant the Roots of Persian and Bulbous Iris's, and also Fritillarias, Hyacinth of Peru, Dens Canis, Narcissus's, and such other bulbous rooted Flowers which will not endure to be long above Ground.

20. Cut down the Stalks of such Flowers as begin to wither.

21. At the latter End sow some Seeds of annuals in warm Borders to stand the Winter, by which means you may obtain good Seeds of many Sorts of Plants, which if sown in Spring, do not constantly produce good Seeds, as great Blue and flesh coloured Lupine, sweet scented Pea, sweet Sultan, Indian Scabicus, double Larkspur, dwarf annual Stock, Venus navelwort, Xeranthemums, Jaceas, &c. they will not come earlier to flower, but also will be much larger and produce them in much greater plenty.

22. Gather the Seeds of all Sorts of flowers as they ripen, and preserve them in their Husks or Pods, till the Season for sowing them.

AUGUST.

1. About the End begin to prepare your Beds for your choice Tulips, Hyacinths and Ranunculus's, that the Earth may settle before the Roots are planted.

3. Transplant Polyanthus's, Primroses, and seedling Auriculas, and water them till they have taken Root.

4. Sow the Seeds of Anemones, Pulsatillas, Crocus's, Ranunculus, Fritillarias, Hyacinths, Tulips, Narcissus's, Cyclamons, Iris's &c. in Pots or Boxes, fill'd with light rich Earth, place the Boxes to the Morning Sun till 10 or 11 a clock, for they must not be too much exposed to the Heat.

4. Shift your choice Auriculas into fresh rich Earth, clear them from dead leaves, and place them in the shade till they have taken Root.

5. Transplant the Layers of Carnations, Pinks and sweet William's which by this Time will have taken good Root if timely laid.

Those choice Sorts of Carnations design'd for Pots may be planted this Time, each in a small Half-penny Pot fill'd with light Earth, placed in a shady Situation till they have taken root, after which they may be removed into a more open Situation, where they may remain till the beginning of October, when they should be placed under a hot Frame, or plunged into an old Bark Bed, and arch'd over with Hay, that they may be cover'd in Winter, but open'd in mild Weather.

But those Carnations, Pinks, and Sweet-William's design'd for Borders of the Pleasure Garden, should be now planted in Beds of the Flower Nursery, to remain till the middle or latter end of next Month, when you must dig the Border of your Pleasure Garden, and new plant them and take them up with a Ball of Earth to their Roots.

8. 14. 15. Water in dry Weather your Pots of Annuals, and if they are tender, remove into Shelter when the Nights begin to be cold.

13. Clean all the Borders from Weeds.

18. Remove yet the Bulbs of Iris's, Fritillarias, and Hyacinths of Peru, and also the Roots of Lillies, Martagons, Crown Imperials, Pæonies, and Flag Iris's, whose Leaves are now decay'd.

20. Cut down the Stalks of such Flowers as have done blowing and are decayed.

21. The Seeds of several Sorts of Annuals may now be sown on warm Borders to stand the Winter, that they may flower early the following Summer.

Summer, as Sweet Pea, Venus Navel Wort, Dwarf Annual Stock, Nobel's Catchfly, &c.

22. Gather all sorts of Flower Seeds as they ripen.

S E P T E M B E R.

1. Plant early Tulips in warm Situations, where they may be defended from cold Winds, and they will flower in *March* or earlier.

Plant your choice Hyacinth Roots.

Prepare your Beds for choice Anemonies, Tulips, and Ranunculus's at the beginning of this Month, if not done the last.

At the beginning plant some of your ordinary double Anemonies in warm Borders, and they will flower early in Spring.

Yet sow your Seeds of Iris's, Tulips, &c.

About the End of the Month plant your choice Anemonies, Ranunculus's, and Tulips, and do it always in showry Weather when the Earth is not over dry, plant them 4 Inches asunder and cover your Anemonies and Ranunculus 2 Inches with Earth, and the Tulips 6 Inches at least.

3. Sow the Seeds of Auriculas's and Polyanthus's in Pots or Boxes of light, rich Earth not too deep.

4. Shelter your Pots of choice Auricula's, if the Weather prove wet, lay them down on one Side.

5. Your Layers of Pinks, Carnations, and sweet Williams which have not been transplanted from the old Roots, the former Month, should be deferred no longer.

Shelter your Pots of choice Carnations if the Weather prove wet, lay them down on one Side.

7. Now is the Time for transplanting your Biennial and Perennial flowers, which were sown in the flower Nursery into the Borders of the pleasure Garden.

Slip and plant out Polyanthus's, Primroses, London Pride, Thrift and all Sorts of Fibrous rooted Plants, and close the Earth fast to their roots.

Part and transplant all Sorts of flag leav'd Iris's else part the Roots of the early flowering Asters, and Virga aureas which are beginning to flower and plant them out in large Borders allowing them proper Room.

10. About the End of the Month transplant most Sorts of hardy flowering Trees, and Shrubs, which will succeed better at this Season than in the Spring, upon dry Ground.

13. Dig the Borders of your flower Garden, and if they require it, add some fresh Earth, or very rotten Dung to them, and plant all Sorts of hardy flowers therein.

11. Your Box Edgings which are grown to thick, should now be taken up, and parted, and planted down again.

20. Cut down the Stalks of such Flowers as are decay'd, and if you do not transplant them, dig the Ground about them, and add some rotten Dung or fresh Earth to the Borders.

O C T O B E R.

1. At the beginning finish planting all Sorts of flower-roots you intend to put into the Ground before *Christmas*, as Tulips, Anemonies, Ranunculus's, Crocus's, Jonquils, Hyacinths, &c.

H

3. Your

3. Your Beds of Seedling Hyacinths, Tulips, Fritilleries and other Bulbous-rooted Flowers, which have remain'd in the Ground all the Year, must be clear'd from Weeds, and some fresh rich Earth sifted over the Beds, about one half of an Inch thick.

Remove the Pots and Boxes of seedling Flowers out of their shady Situation into a warmer Position, clean them from Weeds, and sift a little fresh Earth over them.

4. Clear your Pots of choice Auriculas of all decay'd Leaves and lay them down on one Side, to keep them from wet.

5. Remove your Pots of choice Carnations under cover to defend them from violent Rains.

7. Transplant most Sorts of hardy Tuberose-rooted or Fibrose-rooted Plants as Holly-hocks, Canterbury Bells, French honey Suckles, Columbines, Daisies, Monks-hoods, Bupthalmum's, Polyanthus's, Williams, London Pride, Campanulas, Asters, Golden-rods, Spiderwort, Lychnis Corenaria, Ragged Robin, &c.

10. Remove all Sorts of flowering Shrubs and Trees as Roses, Honey suckles, Spanish-broom, Cytissus's, Laburnums, &c. lay some Mould on the Surface of the Ground to prevent the Frost from penetrating the Roots.

13. Cleanse all the Borders from Weeds.

18. The Borders dug and planted last Month, now rake over again.

21. Continue to plant Box-edgings.

7. Transplant flag leav'd Iris's, Pæonies, and such Geraniums as have thick knobby Roots.

12. Break up your Gravel-walks, and lay them in Ridges.

N O V E M B E R.

1. At the beginning plant your Bulbous-rooted Flowers, design'd for planting before Christmas.

About the End, if the Season prove wet or Frosty, Arch your Beds of choice Anemonies, Ranunculus's, and Hyacinths with Hoops, that they may be cover'd with Mats or Cloths.

3. Place your Boxes and Pots of seedling Bulbous rooted Flowers in a warm Situation, where they may enjoy the Sun.

4. Shelter your Pots of choice Auriculas, from Rain, Frost and Snow by covering of Mats or Cloths, or lay them down on one Side.

5. Ditto the same to your Pots of Carnations.

6. Turn your Composts prepared for Pots or Borders, that their Parts may be equally mixed, and may receive the benefit of the Air and Frost to sweeten them, and render them looser.

Prepare fresh Composts at this Season, it is good to have 3 or 4 Stacks under each other.

7. If the Season continue mild, yet transplant Pæonies, Monks-hoods &c.

10. Yet transplant Roses, Lilacs, Syringas, &c. and most other hardy flowering Shrubs, if the Soil be dry, if otherwise stay till February.

13. The Beds of Bulbous-rooted Flowers, which were not removed last Season, should be raked over, and some fresh Earth spread over their Surface.

20. Cut down the Stalks of such late flowering Plants, which now begin to decay, and rake over the Borders of the Pleasure-garden, to the Surface of the Ground.

D E C E M B E R.

1. Cover the Beds of choice *Ranunculus's*, *Anemonies* and *Hyanths*.

3. Cover your Pots or Boxes of seedling Flowers.

4. Cover your choice *Auriculas* to protect them from great Rains and Snow.

5. Do the same to your *Carnations*.

6. Turn over your heaps of Earth, prepared for the Flower-garden, and the Frost to mellow them, and mix up some new Heaps that you may have a Quantity 8 or 10 Months at least, before you use them.

10. Lay some Mulch about the Roots of your new planted Trees and shrubs.

In mild Weather dig and prepare your Beds and Borders ready for planting, flower Roots in the Spring and lay the Earth up in a Ridge.

Of Pruning PEACHES and NECTARINES.

IN the middle of *May*, when the Trees lately planted, will have several Shoots 6 or 8 Inches long, nail them to the Wall, training them horizontally, rubbing off all foreright Shoots or such as are weak.

But if only two Shoots are produced, and those very strong, nip off their Tops and they will push out 2 or 3 more Shoots to supply the Wall with Branches. Never shorten any Branches in Summer, except to preserve Side Shoots, and never do this after *May*. There will be no need to use a Knife in Summer.

Refresh them with Water the whole Season if the Weather be dry, and water with the Nossel on the Pot, and water over the Heads of the Trees, don't give them too much nor too often.

In the beginning of *October*, when they have done shooting, prune them and shorten their Branches in proportion to the Strength of the Trees, if strong, leave them 8 or 10 Inches, but if weak, only 4 or 5 Inches, and the Middle be void of Branches.

The Summer following, when they begin to shoot, rub off all foreright Shoots, or such as are ill placed, and train the others horizontally to the Wall in their due Order as they are produced, for this is the principal Season, when you can best order the Trees as you would have them, and don't neglect them till Midsummer, as is too often done.

All these Trees produce their Fruit upon the young Wood, either of the preceding Year, or at the most two Years Shoots, after which Age they don't bear; therefore all Branches should be pruned, so as to cause them to produce new Shoots annually in every Part of the Tree, and never fail to go over them 2 or 3 Times in *May*, to do as is above set down.

The distance which the Branches of these Trees should be allowed against the Wall, must be proportioned to the Size of the Fruit or the Length of the Leaves.

The best Season for the Winter pruning is about *Michaelmas* when their Leaves begin to fall, and should not be left alone till *February* when the Sap is in Motion, for it will be drawn up to the extreme parts of the Branches to nourish such Blossoms as must afterwards be cut off.

In Pruning always cut behind a Wood-bud (which may easily be distinguish'd from the Blossom-buds, they are shorter tenderer and more Turgid than the Wood-buds) it being always necessary to have leading Buds to attract Nourishment. The length you should leave the Branches may be in an healthy Tree, 10 Inches or more, but in a Weak one not more than 6 Inches, but in this you must be guided by the Position of the Leading Bud, for it is better to leave the shoot 3 or 4 Inches longer or shorter, provided there be one of these Buds. Cut out entirely all weak shoots.

Nail your shoots at as equal Distances as possible and never upright, for then they are apt to shoot from the uppermost Eyes, and leave the lower parts naked.

OF PRUNING APPLES in ESPALIERS.

The Summer after planting, provide small Stakes about 3 feet long, to drive on each Side your Trees 4 to each, to fasten the new Shoots as they are produced Horizontally and not upright, the Branches being thus train'd in Summer, will want no force or violence to bring them to their Places.

At *Michaelmas* (which I would fix for the Time of Pruning). If the Trees have produced 4 Shoots, cut the 2 outermost to 4 Eyes each, in order to furnish your Trees with Branches, but the 2 undermost may be left 6 or 8 Joynts in Length in proportion to their Strength.

But take this for a general Rule, never shorten any shoots in Summer, unless to furnish Branches to fill up a Vacancy in the Espalier, and this should never be done after *May*, for the Shoots produced after *Midsummer*, are never duly ripen'd and prepar'd, so can never be proper either for the Production of Wood or Fruit.

If your Trees have made 3 Shoots, then at *Michaelmas* shorten the uppermost to 3 Eyes, leaving an upright in the middle of the Tree, and shorten the 2 side Branches to 5 or 6 Eyes in proportion to their Strength, training them horizontally: if they have produced but 2 Shoots the 1st Year, then shorten both to 4 Eyes each.

The 2d Year observe to train all young Shoots horizontally as in the 1st, and displace all fore-right Shoots, which will come handsomely into the Espalier, as fast as produced, that they may not exhaust the Nourishment of the Tree.

At *Michaelmas* shorten the Shoots in the middle of the Tree, or where Branches are wanted to fill up Vacancies, but for ever after, be cautious, of unmerciful Lopping or shortning of Branches, for the more you cut the more they Shoot, and there is no way so sure in the Management of all Fruits, as to leave their Branches at full length, where the Tree is fully supply'd with Wood, training them as horizontally as may be, which will prevent your luxuriant Shooting, and in many Sorts of Fruits, the Blossom-buds are first produced, at the Extremity of the last Years Shoot, so that if they are cut off, you destroy the greatest part of your Crop.

Of PRUNING APRICOCKS.

In the Summer after planting, as new Branches are produced observe to nail them horizontally, and displace foreright shoots, but stop no Shoots in Summer.

At *Michaelmas* when the Trees have done growing unnail their Branches, and shorten the vigorous ones to about 8 or 9 Inches, but the weak ones to about 5 or 6 Inches, and the reason I shorten them thus, is, that it seldom happens that more Buds than 2 or 3 shoot for Branches, and these are for the most part such as are at the extreme part of the last Year's Wood, so that all the lower Parts of the shoot become naked, nor will they ever after produce shoots, and this is the Reason we see so many Trees, which have their bearing Wood situated only in the extreme part of the Tree.

The future good of the Trees depends on the Nailing them as horizontally as possible.

The 2d Summer observe as in the first displacing all foreright shoots nailing the other close to the Wall and horizontally, so that the middle be kept open, and never shorten any of the Shoots in Summer, unless to fill vacant Places, and never then do it later than *April*.

At *Michaelmas* shorten these Shoots, as the 1st Year, the strong ones to 9 or 10 Inches, the Weak ones to 6 or 7 Inches.

The following Year will be nearly the same with these, but only observe the Apricocks, produce their Blossom buds not only upon the last Years Wood, great Care should therefore be had in the Management, not to hurt or displace these.

Observe also in your Winter Pruning to shorten your Branches, so as to furnish fresh Wood in every Part of the Tree, and intirely cut out all luxuriant Branches, or displace them as soon as Produced.

Of PRUNING PEARS.

The 1st Summer after planting the Branches should be train'd to the Wall or Espalier horizontally, or produced without shortning, till the *Michaelmas* following, then shorten them to 5 or 6 Eyes in order to obtain a sufficient Quantity of Branches to furnish the lower part, but when this is done the Shoots ought not to be shortned, unless where Branches are wanting to fill a Vacancy, for whenever the Shoots are stopp'd, the Buds immediately below the Cut, send forth 2 or more Shoots, whereby there will be confusion of Branches and rarely Fruit.

The Distances of the Branches, if large Pears, may be allowed 7 or 8 Inches asunder, the small 5 or 6 Inches.

Pear Trees generally produce their blossom Buds first, at the extremity of the last Years shoots, so that if these are shorten'd the Blossoms are cut off.

It is not necessary to provide a new supply of Wood in Pear-trees as in Peaches &c. which only produce their Fruit on young Wood, for Pears do produce their Fruit upon Cursons or Spurs, which are produced upon Branches, which are 3 or 4 Years old, which Cursons do continue fruitful many Years. During the Summer Season, train in the shoots as they are produced regularly, and displace foreright and luxuriant Branches.

The Season for Pruning is any Time after the Fruit is gather'd till the beginning of *March*, but the sooner the better.

In gathering of Pears great regard must be had to the Bud, which is form'd at the Bottom of the Foot-stalk for the next Years Blossom, which by forcing off the Pear before 'tis ripe is many Times spoiled so that when the Pears are ripe, if they are gently turn'd upwards, the Footstalk will readily part from the Spur, without injuring the Bud, for when the Fruit is growing, there is always a Bud form'd by the Side of the Foot-stalk, on the same Spur, for the next Years Fruit.

Of PRUNING of CHERRIES.

In Pruning these Trees never shorten your Shoots for the most part of them produce their Fruit, but at their extreme parts, which when shortned are cut off.

Their Branches should therefore be train'd at full length Horizontally, observing in *May* where there is a Vacancy, in the Wall, to stop some strong adjoining Branches which will occasion it putting out 2 or more Shoot, by which means at that Season of the Year you may often get a supply of Wood to cover the Wall.

And at the same Time displace all fore-right Shoots by the Hand, for if they grow till Winter, when they are cut out it occasions the Tree to gum in that Part (for Cherries bear the Kaife the worst of any Sort of Fruit-Trees) but be careful not to rub off the Fides or Spurs which are produced upon the 2 and 3 Years old Wood, for it is upon these that the greatest part of the Fruit are Produced, which Fides will continue fruitful for several Years.

And it is for want of duly observing this Caution, that Cherry Trees are oftentimes so unfruitful especially the Morello, which the more it is cut the weaker it shoots.

~~Author~~

Of PRUNING of PLUMS.

Plums do not only produce their Fruit upon the last Years Wood but also upon Cursors or Spurs, which came out of the Wood that is 2 or 3 Years old; so that there is not a necessity of shortning the Branches, in order to obtain new Shoots annually in every part of the Tree (as in Peaches, &c.) since the more the Trees are Pruned, the more luxuriant they grow, until their Strength is exhausted and then they Gum and Spoil.

Therefore the safest Method is to lay their Shoots Horizontally as Produced, at equal Distances in proportion to the Length of the Leaves, and where there is not a sufficient Quantity of Branches to fill up the Vacancies of the Trees, there the Shoots may be pinched in the beginning of *May* (in the manner directed in Peaches) which causes them to produce some lateral Branches to supply those Places and during the growing Season, displace all foreright Shoots.

Of PRUNING VINES.

Cutting of Vines are preferable to shoots lay'd down if rightly chose and carefully managed, for cuttings should be such Shoots,

grown strong and well ripened of last Years Growth, these should be cut from the old Vine, just below the Place where they were produced, taking a Knot of the 2 Years old Wood, which should be pruned smooth, then cut the upper part of the Shoot, so as to leave the cutting about 16 Inches long, so that after this manner but one can be taken from such Shoot: when planted let the uppermost eye be level with the Surface of the Ground.

The Summer after planting rub off all lateral Shoots leaving only the first main Shoot.

The *Michaelmas* following if your cuttings have produced strong shoots, Prune them down to 2 Eyes.

In the Spring after the cold Weather is past, gently Dig up the Borders to loosen the Earth, but be careful not to injure the Root, and raise the Earth up to the Stems of the Plants, so as to cover the old Wood, but not so deep as to cover either of the eyes of the last Years Wood, rub off all dangling Shoots, leaving no more than the 2 Shoots produced from the 2 Eyes of the last Years Wood, which should be fastened to the Wall, and so from this till they have done shooting, look them over once in three Weeks, and rub off all lateral Shoots, and fasten the 2 main Shoots to the Wall, as they are extended in Length which must not be shortened before the middle of *July*, when it will be proper to nip off their tops, which will strengthen the lower Eyes.

At *Michaelmas* Prune them again, leaving 3 Buds to each of the shoots, provided they be strong, otherwise it is better to shorten them down to 2 Eyes, then fasten them to the Wall, drawing each of them out Horizontally from the Stem.

In the Spring dig the Borders as before.

The 3d Season rub off all Dangers as they begin to shoot, and train the leading Shoots, but if they attempt to produce 2 Shoots from the Eye, rub off the weakest.

During the Summer displace all weak, lateral Shoots as produced.

Vines do rarely produce any bearing Shoots from Wood that is more than one Year old, therefore great care should be taken, to have such Wood in every part of the Tree, for the Fruit is always produced upon Shoots, which come out from the Bud of the last Years Wood, so that is always upon the same Year's shoot.

Leave the bearing Shoots about four Eyes in Length (because the lowermost never produce) and 3 Buds are sufficient, for each of these will produce 2 or 3 Bunches. These Shoots must be laid in out 18 Inches asunder.

In Pruning, always make the Cut just above an Eye, sloping it backward from it, that if it should bleed the Sap might not flow on the Bud.

And where there is an Opportunity of cutting down some young shoots to 2 Eyes, in order to produce vigorous Shoots for the next years bearing it should always be done, because in stopping of these shoots, which have Fruit upon them in *May*, it often Spoils the Eyes bearing.

The best Season for Pruning is the End of *September*, or the beginning of *October*.

About

About the latter End of *April* or *May*, when the Vines begin to shoot, rub off all small Buds, which may come from the old Wood.

When 2 shoots are produced from the same Bud displace the weakest.

In the middle of *May* rub off all dangling shoots as before, and nail up all the strong Branches, otherwise it will prejudice the Fruit.

Towards the latter End of *May*, stop the bearing Branches, which will strengthen the Fruit, provided you leave 2 or 3 Eyes above the Bunches.

At the beginning of *July* stop those shoots which are intended for bearing next Year, these should be train'd upright against the Wall till that time, when their Tops may be nipp'd off, to give strength to the lower Buds, during the Summer Season, rub off all dangling Branches, and train up the Shoots regularly to the Wall, but never divest the Branches of their Leaves.

When the Fruit is gather'd, Prune the Vines, whereby the Litter of all Leaves, will be intirely removed at once, and the Fruit will be the forwarder the succeeding Year.

Of Simple

I N T E R E S T

Of any Number of Pounds, from One, progressively to one Thousand Pounds, at the RATES of 5 *per Cent. per Ann.* from one Day to thirty Days, and from one Month to a Year.

The Interest of Money is the Sum payable by the Borrower to the Lender, for the Use thereof. The Money lent is call'd *Principal*, the Money paid for the Use of that is call'd *Interest*, which when only paid for the Use of the Sum first lent is call'd *simple Interest*; but if that Interest is not paid when due, it becomes principal Money, and the Use of those two together is call'd *Compound Interest*. The Sum paid for the Use of 100 Pound for one Year is call'd the Rate of Interest, which is different in the several Countries as follows.

Italy — 3	Spain — 10	Turkey — 20
Holland — 3	Scotland — 10	England 5 and 4
Swedeland — 6	Barbadoes — 10	
France — 7	Ireland — 10	

Increase of Trade is generally the Consequence of low Interest, because the lowness of Interest induces many'd Men to trade, rather than put their Money out at small Advantage. Low Interest likewise Advances the Price of Land, because such many'd Gentlemen think themselves above Trade, or that cannot conveniently follow. They will rather purchase Land, than put out their Money at low Interest: and the more Purchasers there are, the higher the Price of Land will be. Lands and Houses are of different Tenures. Some Tenants are *at will*, as those that have no Lease, but hold their Estates from Year to Year; some hold by Lease for a certain Term of Years; and some for 3 Lives as most of the Lands in the North of England are lett. Copy-hold Estate is when the Possessor holds the same from a Lord of a Manner by Copy of Court-roll. Freehold Estate is when the Possessor pays no Acknowledgement to any Superior to himself, but has it without Limitation to him and his heirs. Such Estate is said to be *Fee simple* or Land of Inheritance. The value of Estates *Fee simple* are worth in most Parts of England from 20 to 27 Years Purchase.

Eighteen-pence Rates for Hackney Coaches.

From Drury-lane Play-house to Queen's-square Westminster
 From Westminster Hall to St. Paul's
 From Westminster Hall to Queen's-square Red-lion fields
 From St. James's Gate to Hatton garden
 From the New Exchange in the Strand to the Royal Exchange
 From the Haymarket Play-house to Hatton-garden
 From Redlion-square to Westminster Hall
 From St. James's to Marybone Church
 From the Royal Exchange to Bloomsbury-square
 From the Royal Exchange to the Watch-house at Mile End
 From the Out-side of Aldgate to Stepney Church
 From Bedford-street Covent-garden to Coleman-street
 From Bread-street to Hoxton-square
 From the Middle of Broad-street to Hart-street Bloomsbury-markets
 From St. Martin's-lane in the Strand to Gold-street by Wood-street
 From the Middle of Gracechurch-street to Somerset-house
 From Guildhall to Brownlow-street in Drury-lane
 From the Royal Exchange to Newington Church, Surry
 From Convent-garden to the Royal Exchange
 From Stocks-market to Charing cross
 From Aldgate to Ratcliff cross.

Every Coachman exacting more for his Hire, or refusing to go at the
 above Rates, whether by Day, or Night, fair or foul weather, forfeits
 forty-Shillings: Which Penalty, or other Corrections, will be inflicted
 on him, if just Complaints are made against him, at the Licensing
 Office for Hackney-Coaches, in Surry-street, in the Strand.

According to an Act made in the Ninth Year of Queen Anne, each
 Coach is to be marked with its Number on Tin Plates, to be fixed on
 both Side the Coach; every Proprietor paying weekly 5 s. by Monthly
 payment, to the Receiver of the Office.

Out of the Eight hundred Coaches, now licensed, two hundred are
 to ply every Sunday, in their Turn, on Forfeiture of five Pounds for
 every one who plies out of his Turn.

Commissioners Licensing above the Number forfeit 100 Pounds.

Each Licence to be purchased for Fifty Pounds; and no Person to
 have more than two Licences.

A Hackney Coachman, plying without a Licence from the Com-
 missioners, forfeits five Pounds.

No Person to use another's Figure, or deface his own, on Penalty
 of five Pounds; one Moiety thereof to be given to the Informer.

Coaches are to stand in the Middle of the Streets, and not against
 Gates; nor in such Streets as are not 30 Feet wide, nor cross
 Street, nor within 8 Feet of Houses, Walls, &c. on pain of
 forfeiting 10 Shillings.

RATES

RATES for HACKNEY CHAIRMEN:

One Shilling Rates.

From Westminster Hall to Covent-garden

From Westminster Hall to Exeter Exchange

From St. James's gate, thro' the Park, to Westminster Hall

From the Hay-market Play-house to the Entrance of Lincoln's Inn Fields

From the Hay-market Play-house to Bolton street

From St. James's-gate to Somerset-house

From Somerset-house to the Upper-end of Hatton-garden

From the Hay-market Play-house to Essex-street

From the Hay-market Play-house to Soho-square

From the nearest Corner of Golden-square to Drury-lane Play-house

Eighteen-pence Rates for Hackney Chair-men.

From Westminster Hall to Marlborough-street

_____ to Soho-square

_____ to Bolton street

_____ to Temple Bar

From St. James's-gate to Queen Anne's-square, Westminster

From Golden-square to Red-lion-square

From Red-lion-square to the Haymarket Play-house

From the Hay-market Play house to Bloomsbury-square

From the Hay-market Play-house to Gray's Inn

Hackney Chair-men are oblig'd to go the same Distances for Eighteen Pence, which the Coaches perform for a Shilling; and if any of them shall refuse to go at, or exact more for Hire than the Rates limited, are liab'e to forfeit for every such Offence forty Shillings.

There are 400 Chairs licens'd

Hackney Chairmen are to take no more than one Shilling for any Distance not exceeding one Mile, and eighteen Pence for any Distance not exceeding one Mile and a half. — The Mile, according to the Stat. Hen. VII. is 8 Furlongs, or 1580 Feet.

A

T A B L E

Ready calculated, shewing at one View,
the Value of any Quantity of Goods,
Wares, or Merchandize, at any Price,
adapted to the meanest Capacities.

The Use of the following T A B L E.

THE several Uses of the following Table are so plain and obvious, that any Direction or Explanation may seem unnecessary, yet for the sake of some who may be less expert in things of this Nature, I will give the following Examples.

1. Suppose you want to know what 33 Pounds, Yards, Gallons, &c. any Commodity will come to at 5 s. per Pound, Yard, Gallon, &c. look first at the Top of the Table for the Price of the Thing, which is 5 s. then cast your Eye down that Column under the Words (*Value*) till you find the Number 33, overagainst which towards the Right and you will find 8*l.* 5*s.* 0*d.* which is the Value of 33 Pounds, Yards, Gallons, &c. of any thing at 5 s. per Pound, Yard, Gallon, &c.

2. Suppose you want to know the Value of some Number of Pounds, Yards, &c. which cannot be found at once in the Table: For Instance, you want to know what 456 Gallons of Wine amount to at 6*s.* per Gallon; the Rule is, first to find the Price (which is 6*s.*) at the top of the Table, then in that Column under the Words (*Value of*) you must find 400, overagainst which, you have the Value of 400

l. *s.* *d.*
120 0 0

Then seek for 56 in that Column and the same Page, and you will find that the Value of 56 Gallons is

16 16 0

So that 456 Gallons at 6*s.* per Gallon is

136 16 0

If the Value of your Commodity is not express'd at the Top of the Table in any one Page, you must then find it at twice; as suppose you

you would know the Value of 45 Yards of Linen at 7s. and 6d. per Yard, look at the Top of the Table for 7s. and against 45 you will have

l. s. d.
15 15 0

Then look at the Top of the Table for 6 Pence, and against 45 you will have

l. s. d.
1 2 0

Which added together is the Answer

16 17 0

4. If the Price of any Commodity is above one Pound, and under 12 as suppose you would know the Value of 70 Anchors of Brandy at 1l. 7s. per Anchor, the Rule is, for the one Pound to put down

l. s. d.
70 0 0

Then look at the Top of the Table for 7s. and against 70 you will find

24 10 0

The Sum of which is the Answer

94 10 0

5. This Table is of use to reduce Shillings, Pence, or Farthings into Pounds: For Instance. In 56752 Farthings, how many Pounds? Look at the Top of the Table for one Farthing

against 50000 you will find

l. s. d.
52 1 0

6000

6 5 0

700

0 14 0

52

0 1 0

In 56752 Farthings are 59 1

In 75468 Pence, how many Pounds?

Look at the Top of the Table for one Penny

against 70000 you will find

l. s. d.
291 13 0

5000

20 16 0

400

1 13 0

68

0 5 0

In 75468 Pence are 314 09

In reducing Shillings into Pounds, you are only to look at the Top of the Table for one Shilling, and against the Number of Shillings you would reduce, you have the Answer.

I omit several Instances in which this Table might be useful with the Help of Multiplication and Division, because I think it is chiefly calculated for such as do not understand Arithmetick.

The Price of the Yard, Ell, Ounce, Pound,
Hundred, Gallon, Hoghead, Chaldron,
&c. being *One Farthing.*

From <i>Charles-Town</i> to any Place not exceeding 60 <i>English Miles</i>	0 4	0 8	1 0	1
And all Letters and Packets from <i>Charles-Town</i> afore said to any Place not exceeding 100 Miles distant	0 6	1 0	1 6	2

The Post-Days to send Letters from *London* to any Part of *England* and *Scotland*, are *Tuesdays*, *Thursdays* and *Saturdays*; and the Returns certain, on *Mondays*, *Wednesdays* and *Fridays*, But to *Wales* and *Ireland*, the Post goes only twice a Week, viz. *Tuesdays* and *Saturdays*; and returns from *Wales* every *Monday* and *Friday*, but from *Ireland* the Return is uncertain.

Mondays and *Thursdays* are the Post-Days for *France*, *Spain* and *Italy*; *Tuesday* and *Friday* for *Holland*, *Germany*, *Denmark* and *Sweden*. And on *Mondays* and *Fridays* the Post goes for *Flanders*, and from thence to *Germany*, *Denmark* and *Sweden*.

Tuesday and *Friday* are the Days the Foreign Mail is due from *France* and *Spain*; *Monday* and *Thursday* from *Flanders*; *Monday*, *Wednesday* and *Friday* from *Ireland*; once a Week from *Spain*, *Portugal*, &c.

The Post-master is to provide Post-Horses on all the Post Roads; providing sufficient Horses, he is liable to a Forfeiture of 5 *l.* is to receive for furnishing a Horse to ride Post, 3 *d* per Mile, and 4 *d.* for the Guide; and he shall not charge any thing for carrying a Bundle, so as it doth not exceed eight Pounds.

All Merchants Accompts, not exceeding one Sheet of Paper, and Bills of Exchange, Invoices, and Bills of Lading are allow'd without Rate.

The Post-master General may erect Cross-Stages, keep Packet-houses, &c. And no Person but the Post-master or his Deputies shall receive, take, or carry Letters, &c. under the Penalty of 5 *l.* and 100 *l.* per Week for Continuance. Opening or delaying Letters, except by Warrant from a Secretary of State, incurs a Penalty of 20 *l.* Carriers, Stage-Coachmen and Watermen, are not to carry Letters, unless they concern Goods carried by them at the same Time.

Of the PENNY POST.

THIS Office was erected for the speedier Conveyance of Letters and Parcels, to any part of *London* and *Westminster*, or within ten Miles from the general Letter-office in *London*. One Penny is paid for the Delivery of any Letter or Parcel, not exceeding one Pound weight, or ten Pounds in Value. If any Parcel is lost, it must be made good by the Office, the Value of such Parcel being wrote on the outside when put in. Abundance of Places all over the City and Suburbs are appointed for receiving Letters and Parcels; from whence they are Collected by Messengers who have their respective Walks. In *London* and *Westminster* Letters and Parcels, are receiv'd and ought to be deliver'd every Hour; in *Southwark* and the more remote Parts of the Suburbs every 2 Hours; in the Towns near *London*, as *Hackney*, *Stepney*, *Chealsea*, *Kensington*, &c. twice a Day; and in the Towns more distant once a Day. The Penny Post is divided into six Offices, where all Letters and Parcels that are brought in are register'd and dispatch'd to the several Places in their respective Divisions as follows.

The General chief Penny-Post-Office, which has the Inspection and Management of all the rest, is kept in St. *Christophers*'s Church-yard Threadneedle-street, which collects, receives, and delivers Letters and in Parcels to and from the following Places, besides what it delivers in its own District in *London*.

1 Norwood	2 Rotherhith	Common
1 Peckham town, and	1 Sidnam	1 Wimbeldon
Rey	2 South Lambeth	1 Woolwich
2 Pigs-march	2 Stockwell	

Hermitage Office is kept in Queen-street on Little Tower-hill, which collects, receives, and delivers Letters and Parcels to and from the following Places, besides what it delivers within its own District in Town.

3 Blackwall	3 Lime-house	3 Ratcliff
3 Isle of Dogs	3 Lime-hole	3 Stepney causeway
3 King David's Fort	3 Poplar	

N. B. The Number plac'd before each Town, Village, &c. shew how often Letters and Parcels are convey'd thither and back again in every Day.

Diverse of the Country Messengers, and others for remote Places going on their Walks by Six o'Clock in the Morning, Letters and Parcels ought to be put in at the Receiving-houses before Six o'Clock over Night; otherwise a whole Day may be lost in the Delivery. But Letters for Places that are nearer, are collected and delivered Two or Three times a Day, as above specified.

All General Post Letters, both Foreign and Domestick, directed to the Places above mentioned, not being Post Towns, are conveyed from the aforesaid Offices every Day at twelve o'Clock; and Answer thereunto being put into the Receiving houses in the Country Towns, will next Night be safely carried to the General Post Office, by the Officers appointed for that Purpose.

To find the Golden Number.

To the Year of our Lord add 1 and divide the Sum by 19 the remainder is the *Golden Number*, and if nothing remain is the *Golden Number* is 19

To find the Cycle of the Sun.

To the Year of our Lord add 9, and divide the Sum by 28, the remainder is the *Cycle of the Sun*, and if nothing remain the *Cycle of the Sun* is 28.

To find the Change of the Moon in any of the Months.

Look in the first Column of the Month you would find it in for the *Golden Number*, and against it stands the Day of the Change.

A TABLE to find the *Dominical Letter* by the *Cycle of the Sun*,

Cycle ☉	D L	Cycle ☉	D L	Cycle ☉	D L
1	g f	11	a	21	cb
2	e	12	g	22	a
3	d	13	f e	23	g
4	c	14	d	24	f
5	ba	15	c	25	ed
6	g	16	b	26	c
7	f	17	ag	27	b
8	e	18	f	28	a
9	dc	19	e		
10	b	20	d		

Perpetual TABLE to find the Number of Direction, by knowing the Golden Number and Dominical Letter.

Golden Numb.	A	B	C	D	E	F	G
1	19	20	21	22	16	17	18
2	5	6	7	8	9	10	11
3	26	27	28	29	30	24	25
4	19	13	14	15	16	17	18
5	5	6	7	8	2	3	4
6	26	27	21	22	23	24	25
7	12	13	14	15	16	10	11
8	33	34	35	29	30	31	32
9	19	20	21	22	23	24	18
10	12	13	7	8	9	10	11
11	26	27	28	29	30	31	32
12	19	20	21	15	16	17	18
13	5	6	7	8	9	10	4
14	26	27	28	29	23	24	25
15	12	13	14	15	16	17	18
16	5	6	7	1	2	3	4
17	26	20	21	22	23	24	25
18	12	13	14	15	9	10	11
19	33	34	28	29	30	31	32

Look for the *Golden Number* in the Side, and the *Dominical Letter* at the Top, and in the common Angle of meeting, you will find the *Number of Direction*.

Example, in 1739, the *Golden* was 11 and the *Dominical Letter* G therefore against 11 and in the Column under G you will find 32 was the *Number of Direction* for that Year.

To

of C O I N.

THE use of Money or stamp Metals in Commerce, is very antient, & perhaps its Invention as hard to be discover'd as those of other Arts. *Josephus* ascribes the Invention to *Cain*, *Janus* understood it as may be seen by his Image on the first Roman Coins. Money was current in *Abrahams* time, but 'tis not certain it was stamp'd, *Phido* an *Argive* or *Greek* is said by profane Authors to be the first who stamp'd Money, but *Herodotus* with more reason ascribes it to the *Lydians*. *Julius Pollux* to *Eritheonius* amongst the *Athenians* and *Lycians*. Some to the *Naxians*, some to the *Phænicians*, others to *Janus* in *Thessaly*, *Cælius* gives it to a Lady, one *Hermodice* wife of *Midas* King of *Phrygia*; among the *Romans*, it stands between *Numa* and *Servius Tullius*. *Pliny* gives it the latter, who first stamp'd Brass: Silver was stamp'd U. C. 484. Gold 546.

The first Money was made of Iron and Copper, and were valued by their Bulk, per *Pensitationem Manuum*. After this, Weight came into use; and at last to avoid the Trouble of weighing it was stamp'd with a particular Mark to shew its Value. The Metal which pass'd current by weight was called *Æs rude*, this the *Romans* used till *Ser. Tullius* stamp'd it. Then every piece of Money which weigh'd a Pound was call'd an *As*.

Æs Brass among the *Romans* gave the Denomination to Money in general, as *Ære mutare* to Buy or Sell, *Æs alienum* Debt, *Æs suum* which owing to us, *Æs circumforaneum*, Money imploy'd in Usury. *Ærarium* the publick Treasury so call'd because at first nothing was lodg'd in it, but unstamp'd Brass which went by weight, and was call'd *Æs rude*; afterwards stamp'd pieces of Brass were lodg'd there, call'd *Æs rude grave*, or *Æs leve*, according to the different weight of the several Coins. *Ærarii* were Officers of the Mint, *Ærarii Milites*, were Soldiers that serv'd for pay; *Æriscare*, *Æriscatores*, those who got Money by scandalous Methods, *Adarare* to set a price upon a thing, *Obæratu* oppress'd with Debt. *Argentum* & *Aurum* is sometimes used to express Money in general.

NUMMUS, some derive from *Numa*, tho' 'twas a word used by the Greeks.

MONETA from whence came our word Money, because it admonishes of the Price, Value, &c.

PECUNIA, from the figure of Cattle stamp'd on it by *Servius Tullius*. The ROMANS reckon'd their Money by the *Æs*, *Æfles*, *Sestertius*, *Nummi*, *Denarii*, *Solidi*, *Pondo* or *Libra*, &c.

The GREEKS by *Drachma*, *Mina*, *Taricks*, *Talents*, &c.

The JEWS by *Shekels* *Talents*, &c.

Of the AS.

This was first made *Libralis* of a Pound weight, so *Dupondius* is a *Æfles*, *Mille Æris* and *Mille Æfles* is the same.

10 <i>Æfles</i>	—	1 <i>Drachma</i>	—	l	s	d
100	—	10	—	0	0	10
1000	—	100	—	0	6	5
		1 <i>Mina</i>	—	3	4	7

Of the SESTERTIUS.

'Tis so called *quasi semisestertius*, according to a Greek figure for *adimon emitalenton* which literally translated signifies a seventh half Talent, so a *Sestertius* which contained 2 half *Æfles* or *duos Æfles*, *cum ter semisse* is so called from *Semisestertius*, this was always Silver.

Of the NUMMUS.

When it was mentioned as a piece of Money it was the same as the *Sestertius*, *Sestertium* in the neutral Gender signifying *Mille Sestertium Nummorum*. The Marks of the *Sestertius Nummus* are—*IIS. LLS. HS. H—S.* which Characters denote 2 and a half *Æfles*.

Observe that *Mille Sestertii*, *Mille Nummi*, *Mille HS. HS. Mille Sestertium*. *Mille Nummum*, *Mille Sestertii Nummi*, *Mille Nummum, Æris* 2500, *Denarii* 250, *Drachma* 250, denote the same Sum, viz. 8 Pound, 1 Shilling, 5 Pence, 1-2.

1 This

Of the Denarius or Drachma, equal to it.

The *Denarius* was the chief Silver Coin among the *Romans*, it weigh'd according to *Greaves* 62 grains *English*; or $62\frac{2}{9}$ grains *English* according to *Arctnot*, and is in Value 7 Pence 3 Farthings, allowing *English* Grains to the Silver Penny.

Of the Pondo, or Mina equal to it.

The *Pondo Argenti* amongst the *Romans* is a sort of numeral Expression of Sums of Money: according to *Budæus* 'tis equal to an attick Mina or Pound 4 Shillings 7 Pence: according to *Agricola*, 3 Pound 2 Shillings 1 Pound 14 Shillings 3 Pence. 'Tis very probable the *Romans* made use of this *Decimal Pondo* or *Libra* in imitation of the *Greek* *Mne*, for what *Livy* expresses by *Argenti Pondo Cinæ & Selibras*, *Plutarch* renders 250 Drachmes. A *Pondo* of Gold decuple proportion to Silver is 27 Pound 2 Shillings 6 Pence.

Of a Talent,

Talanton or *Talentum*, has a great many significations in *Homer*, it commonly signifying a Balance, The *Romans* borrow'd the Word *Talentum*, from the *Greeks*, they seldom used it, but when they spoke of *Grecian* or *Asiatick* Affairs.

A Talent either signifying so much weight or a sum of Money, the Value of it is different according to the different Ages and Countries in which it was used.

Several Writers make a difference between Talents, being of Gold, Silver and Copper, which they Value according to the different Value of the Metals, but they have not consider'd that the Word Talent expressed a fixed and determinate Sum, whether it be in Gold or Silver, much like the *English* Pound, which is always of the same Value; whether it be paid in Gold, Silver or Copper, so that what they call a Talent of Gold, Silver or Copper was the same Sum of Money, in Gold, Silver, or Copper.

T 3

Observations

Observations of the Jewish COIN, &c.

the following Calculations the Shekel is suppos'd Quadruple of the Drachma, according to *Josephus*, and the Proportion of Gold to Silver 16 to 1.

			l	s	d
Shekel of Silver	—	—	0	2	7
Talent of Silver	—	—	387	10	0
Shekel of Gold	—	—	0	2	7
Talent of Gold	—	—	2	1	4
			6200	0	0

The Talents in Passages of the old Test are stated double the Attick; but in Passages out of the *Apocrypha* the Attick Talent is used.

In reckoning Money 50 Shekels make a Maneh, but in weight 60 Shekels.

		Foot,	Inches,
The small Cubit	—	1 485	or 17 82
Square Feet	—	2 20522	
Cube Feet	—	3 2747581	

The sacred Cubit of Bishop Cumberland is 1 824 Feet; or 21 888 Inches

Square Feet	—	3 326976
Cube Feet	—	6 068404224

The Cubit that Dr. *Arbutnot* approves of most, altho' he has not followed it in his Calculat.

		Feet,	Inches,
Square Feet	—	1 7325	or 20 879
Cube Feet	—	3 00155625	
		5 20019620	

This is the *Egyptian* Cubit from whom the *Jews* are supposed to have theirs.

The

The Seven WONDERS of the W O R L D.

FIRST, *Colossus* at *Rhodes*, a Statue of the *Sun* 70 Cubits high, place'd at the Mouth of the Harbour, one Man could not grasp its Thumb with both his Arms, its thighs were stretch'd out to form a Distance, that a large Ship Sailing might easily pass into the Port betwixt them, it was twelve Years a making, and cost 3 hunderd Talents (a *Rhodian* Talent is worth three hunderd twenty two Pound, eight Shillings and four Pence *English* Money), it stood fifty Years, and at last was thrown down by an Earthquake, and from this *Coloss* the People of *Rhodes* were nam'd *Colossenses*, and every Statue since of an unusual Magnitude is call'd a *Colossus*.

Second, The Temple of *Diana* at *Ephesus*; was a Work of the greatest Magnificence, which the Ancients prodigiously admir'd, two hunderd and twenty Years were spent in finishing it, tho' all *Asia* was impoy'd, it was supported by one hunderd and twenty seven Pillars, sixty Feet high, each of which were rais'd by as many Kings, of these Pillars thirty seven were engraven, the Image of the Goddess was made of *Ebony*, as we learn from History.

Third, The *Mausoleum* or *Sepulchre* of *Mausolus*, King of *Caria*, built by his Queen *Artemisia*, of the purest Marble; it was from *North to South* sixty three Feet long, almost four hunderd and eleven Feet in Compass and twenty Cubits, (that is about thirty five Feet high) surrounded with thirty six Columns, that are beautified in a wonderful manner, and from this *Mausoleum*, all other sumptuous Sepulchers are also call'd by the same Name.

Fourth, A Statue of *Jupiter* in the Temple of the City *Olympia*, Carved with the greatest Art by *Phydias*, out of Ivory, and made of a prodigious Size.

Fifth, The Wall of the City of *Babylon*, (which was the Metropolis of the City of *Chaldea*) built by Queen *Semiramis*, whose Circumference was sixty Miles, their breadth fifty, so that six Chariots might conveniently pass upon them in a Row.

Sixth, The Pyramids of *Egypt*, 3 of which remarkable for their height do still remain, the first has a square Basis, and is a hunderd and forty three Feet long, and a thousand high: it is made of so great Stones, that the least of them is thirty feet thick, three hunderd and sixty thousand Men wear employed in Building it, for the Space of twenty Years, the two other Pyramids, which are somewhat smaller, attract the Admiration of all Spectators, and in these Pyramids it is reported that the Bodies of the Kings of *Egypt* lie interred.

Seventh, The Royal Palace of *Cyrus*, King of the *Medes*, made by *Menon* with no less prodigality then art, for he cemented the Stones with Gold.

Of the M U S E S.

THE first, *Calliope*, was so call'd from the Sweetness of her Voice ; she presides over *Rhetorick*, and is esteem'd the most Excellent of the Nine.

The second *Clio*, is so named from Glory, for she is the Historical Muse ; and takes her Name from the Famosness of the Things that she records.

The third *Erato*, has her Name from Love, because she Sings of Amours ; or because learned Men, are beloved and praised by others ; she is also call'd *Saltatrix* ; for she first invented the Art of Dancing, over which she presided, she was also the Inventress of Poetry.

The fourth, *Tbalia*, from her Gaity, Briskness, and Pleasantness, because she sings Pleasantly and wantonly ; some Ascribe to her the Invention of Comedy, others of Geometry.

The fifth *Melpomene*, from the Excellency of her Song, and the Melody she makes when she Sings : she is suppos'd to have presided over Tragedy and to have invented Sonnets.

The sixth *Terpsichore*, has her Name from the Pleasure she takes in dancing, or because she delights in Balls : some call her *Citharisfria*.

The seventh *Euterpe*, or *Euterpia* ; from the sweetness of her Singing : some call her *Tibicina* ; because according to them, she presides over the Pipes ; and some say Logick was invented by her.

The eight *Polyhymnia*, or *Polymnia*, or *Polymecia*, from her excellent Memory, and therefore the Invention of writing History, is attributed to her. It is owing to her that the Songsters add to the Verses they Sing, Hands and Fingers which speak more than the Tongue an expressive Silence ; a Language without Words, in short, Gesture and Action.

The ninth *Urania* was so call'd either because she Sings of Divine things or because thro' her Assistance, men are rais'd to the Skies ; or because by the Sciences, they became conversant in the Contemplation of things Celestial.

The Labours of HERCULES.

FIRST, He tore in Pieces with his Nails, the *Lion* in the Wood of *Nemaea*, which some say fell from the Orb of the *Moon* ; and was Invulnerable by any Weapon, this Place was also nam'd *Cleona*, from whence the *Lion* was call'd *Cleoneas*, this was the first Labour of *Hercules*, he skin'd this *Lion* and with the Skin he made him a Shield and breast Plate.

Second, There was or *Hydra* a *Serpent* in the Lake *Lerna*, in the Field of *Argos* ; that had seven Heads, some say nine, others fifty, when any of these Heads were cut of, another presently sprung up in the Place of it, unless the Blood which issued from the Wound was stop't by Fire. *Iolaus*, the Son of *Ipbiclus*, procur'd fire Brands for him from the neighbouring Wood, and with them *Hercules* staunch'd the Blood issuing from the Wound he made, this seasonable Assistance was not forgotten, for when *Iolaus* was grown to decrepit Age, *Hercules* by his Prayers restor'd him to his Youth again.

X

Third,

Third, He bound the wild Boar, whose fierceness and bigness was equally Admirable, in the Mountain *Erymanthus*, of *Arcadia*, and afterwards brought it to *Euristheus*.

Fourth, He was order'd to bring *Nysæa* an hind, whose Feet were Brass, and Horns Gold, no body dar'd to Wound her, because she was consecrated to *Diana*; nor could any Body outrun her; yet *Hercules* hunted her a Year on Foot, and catch't her, and brought her away on his Shoulders.

Fifth, He partly kill'd and partly drove away the Birds call'd *Stymphalide*, from the Lake *Stymphalus*, which used to feed upon Man's Flesh.

Sixth, He defeated the Army of the *Amazons*, and took from *Hippolyta* their Queen, the finest Belt in the World.

Seventh, He in one Day clean'd the Stable *Augeus*, by turning the Course of a River into it, this Stable had never been cleansed, altho' three thousand *Oxen* Stabled in it thirty Years, whence when we would express a Work of Immense Labour and Toil, in *Proverbial* Speech, we call it, cleansing the Stable of *Augeus*.

Ninth, He overcame *Diomedes*, the most cruel Tyrant of *Thrace*; who fed his Horses with the Flesh of his Guests. *Hercules* bound him, and threw him to be Eaten by those Horses, to which the Tyrant exposed others.

Tenth, He overcame in War *Geryon*, King of *Spain*, who had three Bodies; he took likewise his *Bay-Oxen*, who eat Mans Flesh, and brought them into *Italy*; when he had kill'd the *Dragon* with 7 Heads, and the two headed Dogs, who guarded them.

Eleventh, He kill'd the *Dragon* who watch'd, and then carry'd away the Golden Apple, in the Gardens of the *Hesperides* from whence perhaps he is call'd *Melios*, and Apples was offer'd up in his Sacrifice, when in *Bœotia* no Bull (or Sheep) could be procur'd at the Time of Sacrifices, they took an Apple and stuck into it four Straws, which represented four Leggs, and two others instead of Horns; and another for a Tail, and offer'd *Hercules* this Apple instead of a Victim.

Twelfth, he was commanded by *Euristheus* to go down into Hell, and bring away from thence the Dog *Cerberus*, this he perform'd without delay, and bound the Three-headed Monster in a Triple-chain; and by force brought with him up to the Earth the Dog, who strove and resisted in vain, when *Cerberus* saw the Light, he Vomited and from thence the poysonous Herb, wolf-bane Sprung, These are the twelve Labours of *Hercules*.

T A B L E, whereby one may suddenly know (without any use of Multiplication, save only by adding a Cypher or Cyphers, to the Sums contained therein) how many 4 Pence, 2 Pence, Pence, Half-pence, Farthings, and Half-farthings, are contained in any Number of Shillings or Pounds whatsoever.

By adding one Cypher to any Number, you may increase the Value thereof 10 times, by adding two, 100 times, by adding three 1000 times, by adding four, 10000 times, &c. As for Example, if you add a Cypher to 48, which is the Number of Farthings that are in one Shilling, you may perceive there- of the Farthings that are in 10 Shillings, if you add two Cyphers to 48, you may know the Farthings which are in a 100 Shillings, &c.

A TABLE of Expence.

By the Day.	By the Week.	By the Month.	By the Year.

The Government of this City, is divided into six Wards or Districts, each of which has an Alderman or principal Member, chosen by the

Of the Cities of LONDON and WESTMINSTER.

LONDON is the Metropolis of GREAT-BRITAIN, the richest, most populous and most flourishing City in Europe.

The greatest Part of it is built on an Hill, with an easy Ascent from the River *Thames*, where it forms itself into a Crescent or half Moon. Its Length from East to West, i. e. from *Lime-house* to *Tuttle-Street* in *Westminster*, reaches about eight Miles; and its Breadth from South to North, i. e. from *Blackman street* in the Suburb of *Southwark*, to *St Leonard's Shore-ditch*, about three Miles, it contains an hundred and thirty five Parishes and Parish Churches:

One Cathedral and one Collegiate Church; viz. *St. Paul's* in the City, and *St. Peter's* in *Westminster*.

Sixty-nine Chapels.

Twenty-eight Foreign Churches.

An hundred Meetings of all Persuasions, and several Roman Catholic Chappels.

Thirteen Hospitals,

An hundred Alms-houses.

Three Colleges.

Twenty-seven publick Prisons.

Eight publick Schools.

Sixteen great Markets for Flesh, &c.

Twenty three smaller.

Fifteen Inns of Court.

Four Play-houses.

Twenty seven publick Squares.

Two Bridges across the *Thames*.

Forty nine Halls belonging to the several Companies of Citizens.

Two Bishops Palaces.

Two Royal Palaces.

Eight Principal Gates, viz. *Ludgate*, *Newgate*, *Maregate*, *Bridlegate*, *Aldergate*, *Cripplegate*, *Bishopsgate*, and *Algate*, and about 2000 Streets, Lanes, Courts and Alleys; 130000 dwelling Houses, and allowing 8 Souls to each House, which is a moderate Computation) the Number of Inhabitants will amount to 1040000: there are likewise many fine Houses; among which the most considerable are *Montagu House* and *Bedford House* near *Bloomsbury Square*, *Powis House* in *Ormond street*, *Newcastle* and *Lindsey Houses* in *Lincoln's-Inn-Fields*, *Buckingham* and *Marlborough Houses* in *St. James's Park*, *Burlington* and *Devonshire Houses* in *Piccadilly*; *Queensborough House* in *Burlington Gardens*; with many fine Buildings in those Parts, each of which deserve a particular Description.

The Government of this City, is divided into 26 Wards or Districts, each of which has an Alderman or principal Member, chosen by its own Inhabitants.

Inhabitants; and out of this Body is annually chosen on the 29th of September, the Lord Mayor or supreme Magistrate of all the City; He is the chief Judge of London, and has Power to summon and imprison all who are subject to his Jurisdiction, and is styled Conservator of the River of Thames.

When he publickly appears abroad, he is in a Coach of State and wears a long Robe, of Purple or Scarlet, with a Chain of Gold and a rich Jewel to it round his Neck: He is attended by several Officers walking before, and on each Side of him, and to support this his Magnificence, his Place and Perquisites are said to be worth 9 or 1000*l.* per Annum.

The next in Dignity and Power to the Lord Mayor are the Aldermen; each of them has under him a certain Number of Common-Council-Men, one of whom is his Deputy, besides under Officers: These as well as the Aldermen are chose by the Inhabitants of each Ward. The Mayor and Aldermen chuse the Recorder, who is their Speaker, and their Councillour as to the Laws and Customs of the City.

The two Sheriffs are also considerable Magistrates, especially in their Power to impannel Juries, they are chosen yearly on *Midsummer-Day* by the Livery-Men.

The Chamberlain of London is an Office of great Trust, being intrusted with the City-Cash and the Orphans Money: He has also full Authority over the Apprentices of the City, and is chose by the Livery Men.

The Common-Council, are Members yearly chosen out of every Ward, to the Number of 231, by the Livery Men from amongst themselves to represent the whole City.

The Livery Men of the City of London are such, who having faithfully served their Apprenticeships, have taken not only the Freedom of the City, but also the Livery or Gown of their respective Company.

The City and Liberty of *Westminster* reaches towards London as far as *Temple Bar*, where the Jurisdiction of the Lord Mayor of London ends. The Dean and Chapter of *Westminster* are vested with all manner of Jurisdiction Ecclesiastical and Civil, belonging both to the City and Liberty of *Westminster*; but the Management of the Civil Part since the Reformation, is in the Hands of Laymen, the Principal of which is the High-Steward, who is commonly a Nobleman and holds his Office *durante vitâ*. Next to him is the High Bailiff, who summons the Juries, has all the Bailiffs of *Westminster* subordinate to him, and manages the Election of Members of Parliament for *Westminster*; There is also a High Constable, who has all the other Constables of the Liberty under him; there are likewise fourteen Burgesses, *viz.* seven for the City, and seven for the Liberty, each having an Assitant.

Having given this general Description of the Cities of London and *Westminster*, and of their different Governments, I will just point out such of the most remarkable Places and things as are worth the Notice of the Curious; and amongst these *St. James's House* claims the first Place as it is the Kings Palace, but the last as a Building, being very irregular and not at all magnificent: but the Park adjoining to it, is perhaps the most beautiful thing of the Kind in Europe.

The Banqueting House at *Whitehall*, built by *Inigo Jones*, and the Painted Ceiling by *Rubens* are worthy of Notice, likewise a Pedestrian Statue

Statue of Brass of King *James* the Second, in the Privy Garden. *Westminster Abbey* for its great Antiquity and the many curious Monuments in it, deserves great Attention, as also the *Parliament-house*, and *Westminster-hall* where the principal Courts of Judicature are held viz. The High Court of *Chancery*, the Court of *Kings-Bench*, common *Pleas*, and Exchequer. The Curious will likewise see the Cottonian Library of Manuscripts near this Place. The new *Treasury*, the *Admiralty-Office*, and the *King's-Stables*, are worth seeing, as also *Northumberland-House*, the *Savoy* and *Somerset-House*; the *Temple* and all the Inns of Court. *St. Paul's* is a noble Structure and worthy of much Observation, as is also *Guild-hall*, the *Monument*, and the *Royal-Exchange*. In the Tower, the Armories, the Mint, the Crown Jewels, and the Records of the Kingdom, demand the Notice of the Curious. The Hospital of *Greenwich* for disabled Seamen, and the College at *Chelsea* for old Soldiers are noble Foundations. The *Custom-house* and a view of the Ships in the River, give a great Idea the Wealth and Trade of this Kingdom; and the Number of beautiful Villages, and the noble Buildings within ten Miles round the City are not to be parallel'd in *Europe*, or perhaps in the World.
